

Trenton Bohling demonstrates an energy-free livestock watering system to Extension Educators Bruno P. Lena and Ritika Lamichhane

Two Nemaha County families, the Bohlings and Kennedys, participated in Weather-Ready Farm, a two-year program aimed at providing farmers with new strategies and technologies to prepare for extreme weather events. As part of the program, the Kennedys have installed a farm backup generator and shared, “University of Nebraska Extension delivers a variety of agricultural educational opportunities to southeast Nebraska. It is up to each of us to take advantage of this information. The Weather-Ready Farm program is just one of the up and coming examples we should consider in our daily practices.”

Programs At-A-Glance

- 131 community members attended meetings to learn about pesticide safety, solar energy, agriculture estate planning, and the Emerald Ash Borer issue in the community.
- 78 youth learned to be more effective leaders through 4-H leadership lessons on how to become tomorrow’s leaders and role models.

468

youth participated in 4-H youth development programs.

STRENGTHEN NEBRASKA AGRICULTURE & FOOD SYSTEMS
