Directions to Download Your Data (from iPad to computer)
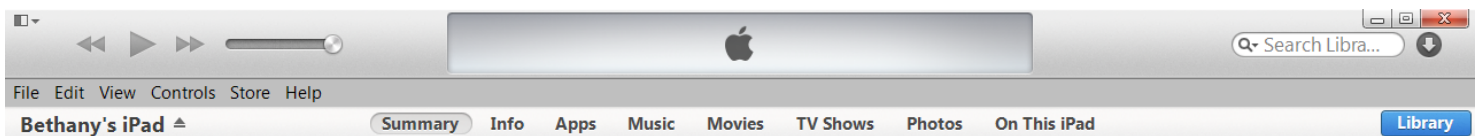

*Plug your iPad into your computer (using your white cord).

*iTunes should automatically start up on your screen. (*Notice there are several steps needed to synch. It may take a while to go to the next step.*)

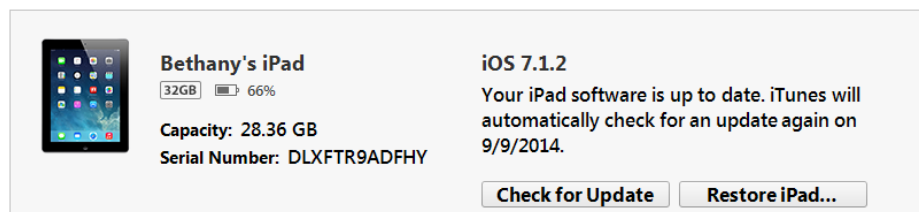

*Click on the iPad button (don't click the arrows NEXT to it– but click on the letters "iPad"). This button is in the top right hand corner of your screen.

*The screen below will open. You are on the "Summary" screen. Click on the "Apps" button (located at the top) to move to your GrassSnap app.
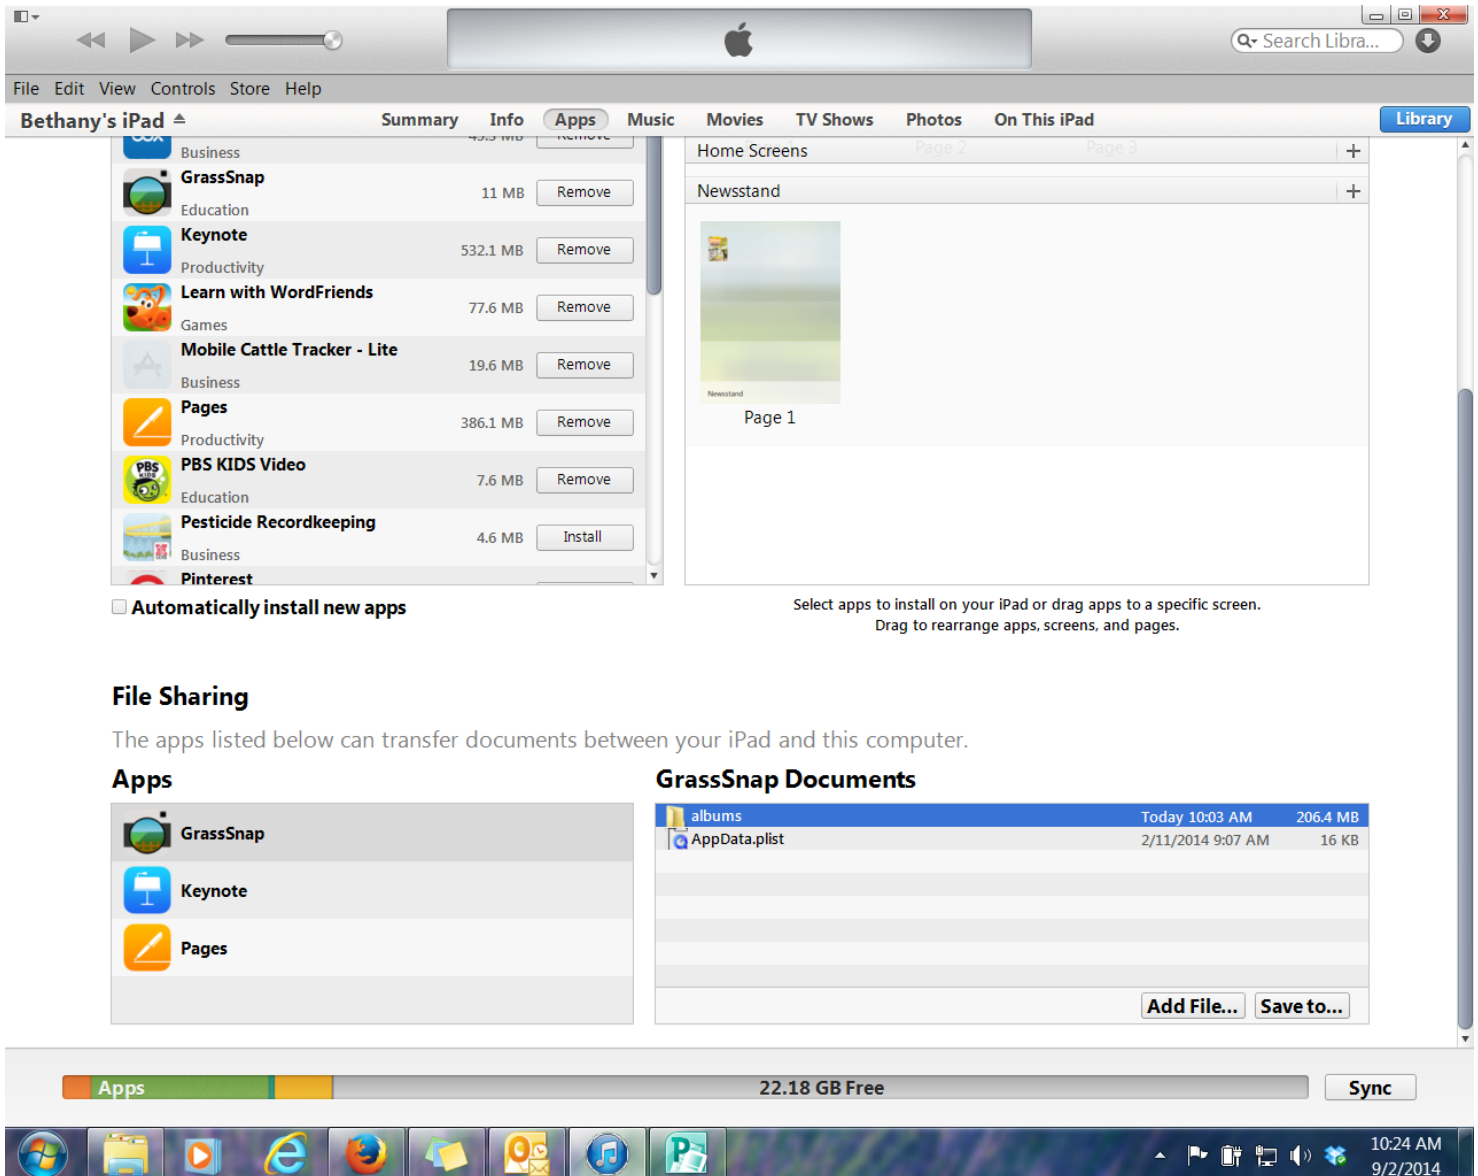

INSTRUCTIONS CONTINUED...

*Now scroll down to the **FILE SHARING** category. Click on "GrassSnap" on the left side.

*On the right side, GrassSnap Documents will come up. Click on "albums".

*Click on "Save to" and choose your location on your computer.

*Your photographs and data should be saved on your computer.

*You may copy these files to a CD or flash drive. (*Ask your NRCS office if you can submit monitoring information this way. Submitting data/pictures electronically will save you a lot of ink on your printer.*)
