Getting Started Project Goals

Goals are the tools that will help you decide how to get where you want to be and how to measure your success. Each project goal has three parts: the action, the result and the timetable.

For example, if your goal is "Before the county fair, I want to learn what a judge looks for in a good showman," the phrase "I want to learn" is the action portion of the goal. The result would be that you would know what a judge looks for in a good showman and the timetable would be by county fair.

It is important to be able to control the outcome of your goals. Give each of your goals a control test. Does the action part of your goal tell what you will do? The goal listed above passes the control test because it states that you will learn. However, if the action mentioned in the goal is what someone else will do, the goal does not pass the control test. The goal statement, "I will have the champion at the county fair," does not pass the control test because the judge provides the action that decides the county fair champion.

To get ideas for your goals, look through your 4-H project materials, and talk to your leader, parents and/or friends. Jot down a list of things you'd like to learn and do. Write the goals you decide upon for this project in the spaces on this form. Add pages if you need to. As you work toward reaching your goals, record what you do and learn.

My Goals: (check for the three parts)

Does it pass the control test? ___ Yes ___ No

Date	What I Did	What I Learned

How will I use what I learned in the future?

Product Quality and Efficiencies

Describe the quality measurements for all the produce marketed during the year (for example, carcass traits, protein content of milk, grade of eggs). Your 4-H project manual will describe some of the quality measurements you will want to include.

Describe the production efficiencies you measured during the year (for example, growth rate, feed efficiency, calving interval, mortality rate, eggs/hen/year). Your 4-H project manual will describe some of the efficiencies you will want to include.
