

**E440001 - First Aid Kit (SF110)** - A first aid kit is a good way to organize supplies in an emergency. The kit should be assembled in a container appropriate for the kit's intended use. Items should cover the following areas: airway and breathing, bleeding control, burn treatment, infectious disease protection, fracture care and miscellaneous supplies. Use Citizen Safety manual, 4-H 425, pages 6 & 7 for guidance. See fairbook for specific rules about kit.

**Use this sheet or print out your own to include with your exhibit**
