

Dr. Darren Jarboe is assistant director and program leader for the Agriculture and Food Systems Extension (AgFS) Program at the University of Maryland, College Park. He leads a team of 63 Extension faculty and staff who conduct applied research, develop and deliver research-based educational programs, offer nutrient management solutions, and serve Maryland communities. Prior to arriving at UME, he was program manager for technology commercialization, marketing, and communications at the Iowa State University (ISU) Center for Crops Utilization Research and the BioCentury Research Farm focusing on commercializing technologies in the food, feed, and biorenewables sectors. He co-founded Gross-Wen Technologies, Inc., a startup company commercializing an innovative wastewater treatment technology. Darren holds B.S. degrees in agronomy and agricultural business, a M.S. in business administration, and a Ph.D. in industrial and agricultural technology from ISU.
