

# Clay County

## 2021 Impact At-A-Glance

Brought to you by Nebraska Extension

clay.unl.edu

Clay County 4-H is committed to providing experiential learning to youth ages 5-19 years of age. Programs help youth develop critical thinking, life skills, career readiness and interpersonal skills.

Rachel, a 4-Her has learned life skills through 4-H. She has used her work ethic to complete projects to her best ability. She uses time management to complete project and has learned to congratulate others for their accomplishments which she says is “significant because it is encouraging and motivating to know that someone is willing to acknowledge work you put into your projects. This can be used in all aspects of life to motivate others to continue thriving. Life skills I have learned through 4-H, are substantial. These skills will help me improve my life and others’ lives.”

### Programs At-A-Glance

- **Healthy Living:** Ninety-nine elementary students were reached by school enrichment nutrition kits. These meet the health curriculum objectives required for each grade level.
- **Agriculture:** 76 people attended the Cow/Calf College and 65% of participants significantly or majorly improved their understanding of nutritional management for the breeding season.

# 1 IN 2

Clay County youth were reached through 4-H and Extension programming.

# 106

 high school students experienced Connecting the Dots, an interactive career exploration simulation.

# 74

 youth and 13 volunteer leaders participated in the 4-H shooting sports program.
