ACCOUNT

The Rural Prosperity Task Force is working toward community resilience for economic prosperity in Northwest Nebraska through a USDA RCDI grant built around enhancing regional tourism development. Utilizing Rural Fellow interns, we have been able to create and publish a visitor survey to collect information on travelers to the area, populate a “one-stop-shop” tourism app, and produce some video blogs of the scenic region. Working with county travel boards in the north panhandle we are also helping expand the development and use of trails in the region.

Programs At-A-Glance

- The Sioux County Warrior Bots Robotics Team competed regionally in the Nebraska FIRST LEGO League Challenge. They received the Innovative Project Award and went on to state competition.
- Two full-time interns helped to organize and present workshops and prepare for the Sioux County Fair. Workshop participation and fair exhibits were up from last year.

27% increase in 4-H enrollment due to increased marketing and opportunities.

33% of enrolled youth are involved in Shooting Sports.

The Sioux County Warrior Bots Robotics team is the first in the county to qualify for state competition.
