## 2021 Impact At-A-Glance

Brought to you by Nebraska Extension

[wayne.unl.edu](http://wayne.unl.edu)

Teen Supreme develop leadership skills and explore career opportunities by assisting with Clover Kids. Teens engage participants in a children's book and plan and assist in learning activities.

“Through 4-H, I have learned that I love working with people. All of the meetings, Clover Kids projects, achievement nights and fair weeks have pointed out how much I enjoy the presence of people and helping people in whatever way I can. This encourages my desire to obtain a career in the health field so that I can continue to aid others in the healthy lifestyles. I attend the University of Nebraska-Lincoln majoring in Biological Sciences, as growing up in an ag based community, living and working on a farm, and taking part in this 4-H has kept my eyes open to the ag career field as well.”

### Programs At-A-Glance

- 1030 sophomores from 40 High Schools, registered for the Northeast Nebraska Career Day, learning from career experts and participating in career/college readiness sessions.
- 15 leaders make up Leadership Wayne Class XIII. With community prosperity in mind, participants cultivate personal leadership, build community connections, & explore local assets.

Early Childhood STEM Imagination Guides had 36 children and 5 Child Care providers participate.

Cover Crop Research study effects of pre/post harvest cover crop planting on soil health/crop yields

High school students and food personnel learn safe food handling practices in ServSafe.
