

Buffalo County

Impact At-A-Glance

Brought to you by Nebraska Extension

Buffalo.unl.edu

With the watercolor banner, they learned about how watercolor can be absorbed, repelled, or react with other things to make it look like art.

There were 6 pop-up workshops across Buffalo County to engage youth with science and art. Youth learned about the relation of slime and science. They learned about atoms, molecules, and polymer chains. They were also able to complete a project that can be taken to the fair. In total, 68 youth attended these workshops, ranging from 1st grade to 6th grade. “The kids had a lot of fun at the pop-up workshop so we wanted to make sure they got signed up for some more like it,” Participant Parent

Programs At-A-Glance

- 96% of 3rd graders know where their milk comes from after completing ag literacy lessons through school enrichment.
- 95% of adult participants reported that they look at food labels for sugar, salt, and portion sizes learned through lessons from Nutrition Education Program.

210
