

Nemaha County

Impact At-A-Glance

Brought to you by Nebraska Extension

Nemaha.unl.edu

Extension Educator Gary Lesoing demonstrates impact of no-till and cover crops on water infiltration and soil erosion to Johnson-Brock High School Agronomy Class.

Trent and Ashton Bohling have learned by working with Extension Educator Gary Lesoing and Nebraska Extension on the farm and in the classroom for several years. “Working with Gary and Extension provides an extra dimension by bringing more agricultural experiences into my classroom and students’ family operations. The wide range of expertise and experiences that Gary and Extension provide bridges the gap between academics and real-world applications. Sifting through relevant research and education can be daunting but leaning on Extension programs has brought relevant ideas to our professions.”

Programs At-A-Glance

- 212 farmers attended agricultural meetings in Nemaha County to learn about pesticide safety, agronomic practices, cover crops, soil health, farm management, and on-farm research.
- 21 youth are better prepared to care for the next generation, a result of training provided by Extension.

73

Nemaha County youth were reached through the Extension After-School Programs.

196

youth received instruction through Extension school enrichment programs.

32

youth grew their entrepreneurial skills through Lemonade Stand Camp taught by Nebraska Extension.
