

Fillmore County 2020 Impact At-A-Glance

Brought to you by Nebraska Extension

fillmore.unl.edu

Fillmore County 4-H provides hands-on learning through an outdoor classroom, including an apiary, established in 2018. Managed by a 4-H family, apiary education reaches residents 3 - 90 years of age!

Madeline, a Fillmore County 4-Her, has been impacted by 4-H and her experiences are preparing her for college. Her participation in the Ag Innovators Experience has helped her pursue her interest in a future teaching career. Teaching younger youth has given her experience with an age range and subject matter she hopes to teach one day. "It's fulfilling to know that I'm impacting and educating the next generation. I've also learned a lot about responsibility through 4-H by establishing and maintaining the apiary. 4-H always has a new way to keep me engaged."

Programs At-A-Glance

Farmers & Ranchers College: Over 260 people participated in managing over 120,000 acres and nearly 22,000 head of livestock for a potential impact of \$1.7 million.

Ag Literacy Festival: Since 1997, AgVenture Day has helped support agriculture by teaching over 4,000 youth where their food comes from.

1 IN 2
