

# Boone & Nance Counties Impact At-A-Glance

[boone-nance.unl.edu](http://boone-nance.unl.edu)

Boone/Nance 4-H provides STEAM programs to foster collaborative learning, creativity, and critical thinking, enriching the educational experience for homeschool students in grades K-6th.

Since the 2022-2023 school year, 4-H staff have partnered with local homeschool communities to provide a multitude of monthly STEAM activities for children in 3rd-6th grade. This year, the office introduced a literacy-focused STEAM group designed for K-2nd grade. Lindsey, a parent, shared that her children have loved the opportunity to not only meet other students their age(s), but to problem solve and think creatively. Lindsey also shared that the program has helped her children interact with others who offer different perspectives, providing wonderful enrichment to her family homeschool.

### Programs At-A-Glance

*Go NAPSACC enhances child care practices, improving child nutrition (31%), breastfeeding support (1%), physical activity (10%), outdoor play/ learning (7%) and screen-time management (17%).*
