

Nemaha County 2024 Impact At-A-Glance

Nemaha.unl.edu

Participants learned about flower production on a farm tour led by owner Cailyn Winkelman.

During a tour of her farm, Cailyn Winkelman discussed her cut flower business and production practices, stating, “The Extension Program gave light to a lot of great connections through our farm tour. I made a lot of new friends and new connections that will be lifelong in my flower farming journey. I think it is important to grow our specialty markets and farms and to educate folks on all the great benefits a specialty market can offer.”

Nebraska Extension partnered with a local bank and USDA Service Centers to provide information about funding opportunities for crop diversification and marketing.

Programs At-A-Glance

- *Sixty-one community members learned about pesticide safety, specialty crops marketing, and water and cropping systems through meetings and one-on-one interactions.*
- *Nebraska Extension led 248 youth in ag related lessons on Nebraska-grown crops.*

725

youth participated in 4-H development programs.

100%

of fifth graders benefited from 4-H leadership lessons that taught them how to become tomorrow's leaders.

122

Nemaha County youth were reached through STEM lessons after school .
