# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

### **ADVENTURE TOGETHER 4-H SUMMER CAMPS**

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

### **ADVENTURE TOGETHER 4-H SUMMER CAMPS**

Welcome to Nebraska State 4-H Summer Camps! Registration is open for the Adventure Together 4-H Summer Camp series! # THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

## **ADVENTURE TOGETHER 4-H SUMMER CAMPS**

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

## **ADVENTURE TOGETHER 4-H SUMMER CAMPS**

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

## FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

## Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!

# THIS & THAT

### FIRST LEGO LEAGUE CHALLENGE 2023-2024

Plans are under way for the 2023-2024 FIRST LEGO League Challenge. In Nebraska, FIRST LEGO League has been hosting "Team Work Days or Team Collaboration Days or Scrimmages". It has been a way for teams and coaches to work together, not only for the day but potentially the season. The teams work together in an informal setting where the pressure is minimal and there are many pathways for learning. Building and programing, mock judging, scored robot games matches, mentoring from veteran volunteers and FIRST alumni, and learning sessions for coaches/ mentors are all examples of Team Work Day activities. "Team Coopertition Days" may include many of those activities.

### Championship 2023-2024

For the Championship, there will be a two day event held at the University of Nebraska-Lincoln Campus on Friday, March 15 and Saturday, March 16, 2024. The event will be held during the UNL Spring Break which will allow us to be on campus during the school year. Teams will be able to take campus tours, check out our facilities and explore the different educational paths for their future!

By hosting this event on campus in a two-day format, we will be looking at holding judging on Friday with majority of the robot game on Saturday. We will also be looking into the incorporation of callbacks for judging on Saturday. In conjunction with the Nebraska FIRST Championship, we are also building a STEM learning event to be held on Friday that youth will be able to participate in.

Lastly, all teams will be eligible to register for the Championship. Yes, it is going to be a BIG event! Watch for more information soon!
