4-H LIVESTOCK PREMIUM SALE

Superintendent Dennis Heim

The 4-H Livestock Premium Sale is a promotional activity for the Cass County 4-H Program. Hopefully, the 4-H member will view the premium sale as an opportunity to show the county his/her achievements in the livestock project. This premium sale is for market livestock only.

1. All market animals to be in the sale must be consigned to the sale by 30 minutes following their show. Market beef, sheep, swine, and meat goat exhibitors putting their animals in the premium sale will sell them as premium only, meaning dollars per head not cents per pound. Exhibitors will have the choice of retaining ownership or shipping the animal for sale. Exhibitors retaining ownership will only receive the premium from the premium sale. Exhibitors of shipped animals will receive the premium from the buyer in addition to the sale proceeds from the buyer of the animal. Premium sale buyers of animals eligible for sale will still have the opportunity of purchasing it for the base bid per pound times the animal's weight in addition to the premium bid on the sale.
2. Owners of animals participating in the premium sale are to be at their pens and/or stalls to take the animals through the sale ring. If they are not present, the animal will not be sold. ROUND ROBIN SHOWMANSHIP

Co-Superintendents Jessica Vallery & Matt Hammer
Friday, 4:00 p.m., Livestock Show Ring

The Contest will consist of five, ten minute stations (each of the species) plus three minutes in between stations (to allow exhibitors to get to the next station and ready to show). The contest will begin with a livestock production and quality assurance exam for all involved species. Exhibitors will use their own animals unless permission is given by a round robin superintendent.

General Information: The contest will consist of ten exhibitors, two from each of the following senior showmanship areas: beef, sheep, swine, meat goat, horse. The contest gives 4-H exhibitors a chance to learn about other species of livestock and develop camaraderie and dialogue between exhibitors of different livestock species. The hope is that the showmen will take the time to learn about the other species they will show in the round robin. Their knowledge will be tested through an exam that will factor into their final score. Judging will be based on ring etiquette, awareness of the judge, answering judge's questions, ability to follow instruction, and appearance in the ring.

All youth will meet at the horse arena after taking their exam and do all horse rounds first. The other rounds will follow in the livestock arena.

Each showman is responsible for supplying their animal and all items necessary to show that animal.

Choosing Exhibitors: Senior showmen will be chosen through their respective livestock showmanship classes. The senior champion and reserve showman are eligible for the round robin competition. If a senior showmanship winner does not wish to participate in round robin, the third place senior winner will be asked to participate. If the third place winner declines, the next senior purple ribbon winner will be asked. If all purple ribbon senior showmen decline, the champion intermediate showman will be invited to participate. If an exhibitor wins or receives a reserve place in more than one species showmanship class, they will choose the species they would like to represent. In this instance, another exhibitor will be chosen for the area(s) in the same manner as if an exhibitor would turn down the opportunity. The winner will represent Cass County in the State Fair Elite Showman Contest.

- D. **CRITERIA FOR JUDGING** - Exhibits will be judged according to the score sheets available at your local extension office or at <http://4h.unl.edu/county-fair/scoresheets>. Check with your local extension office for your county's altitude and how that affects food processing times and pounds of pressure.
- E. **RECIPE/LABELING** – Recipe must be included, and may be handwritten, photocopied or typed. Commercially prepared mixes are not allowed. See <http://food.unl.edu/web/preservation/home> for current USDA guidelines, how to find your Nebraska altitude, and proper procedures for food preservation. Jars should be labeled with name of 4-H'er, county, and date of processing. All exhibits must include the 4-H Food Preservation Card attached to the project as the required supporting information or include following information with exhibit:

Multiple dried food exhibits should be secured by a rubber band or "twisty" to keep exhibit containing the 3 self-sealing bags together.
- i. Recipe and source of recipe (if a publication, include name and date)

NOTE: Recipes can come from any source but current USDA guidelines for food preservation methods MUST be followed. See <http://food.unl.edu/web/preservation/home> for current USDA guidelines.

General Areas

DEPARTMENT GENERAL AREAS

Superintendent Teresa Hawks

Each individual is limited to one exhibit per class. If more than one item per class is entered they will be judged and displayed but no premium will be awarded. Static exhibits must receive a purple ribbon at county fair to be exhibited at State Fair. Dave and Jeanette Freel are donating \$100 to

be divided among the Champion & Reserve winners in the areas of welding, woodworking, safety, and electricity.

GENERAL INFORMATION

- The name and county of each exhibitor should appear separately on the back of each board, article, and set of plans so owners of an exhibit may be identified if the entry tag is separated from the exhibit.
- Several classes require a display board which should be a height of 24 inches and not to exceed 1/4" in thickness. A height of 23 7/8 inches is acceptable to allow for the saw kerf if two 24 inch boards are cut from one end of a 4' X 8' sheet of plywood. Nothing should be mounted within 3/4" of the top or bottom of the board.
- Fabricated board such as plywood, composition board, or particle-type lumber may be used for demonstration displays.
- Demonstration boards should be sanded and finished to improve their appearance. The finish on a demonstration board will be judged as a woodworking exhibit.
- Demonstration boards should include an overall title for the display, plus other necessary labeling.
- All reports should be clearly written or typed and enclosed in a clear, plastic cover. The reports should be attached securely to the display.

FORESTRY

DIVISION 320 - FORESTRY

Premium 5

GENERAL INFORMATION: The official reference for all forestry projects is [Tree Identification Manual \(4-H 332\)](#). Other helpful forestry references include "Trees of Nebraska" (EC 92-1774-X), "4-H Forestry Program Unit B-Forests" (CO 752), and "Plant a Tree" (EC 17-11-80).

- A. Display "boards" must be made from wood or wood composite, e.g., plywood, fiberboard, or Masonite, 1/4" to 1/2" thick and no larger than 24" x 24".
- B. Display boards may be coated, e.g. painted, varnished or equivalent to prevent warping.
- C. Display "posters" must be made from a material, e.g. foam board or poster board that will stand upright without buckling, and be no larger than 24"x24".
- D. Display "books" must measure no more than 16"x16".
- E. At least 5 of the 10 samples in Classes 2, 3, 4, and 5 must be from the list of 60 species described in 4-H 332. Samples must be from 10 different tree species. For example Emerald Queen Maple and Crimson King Maple are both varieties of the same species (Norway Maple), and thus have the same genus and species name, i.e. *Acer platanoides*. All samples must be from trees, No shrubs. If more than 10 samples are included in the display, only the first 10 samples from the current year will be judged.
- F. Remember that other general labeling standards apply. For example scientific names are always italicized or

underlined. Also, the first letter of a Genus name is always capitalized. The first letter of a species name is always lower case. When required, always indicate complete scientific names (Genus and species) and common names, (e.g. Norway Maple) even when "variety names" are included. For example the scientific name of Emerald Queen Maple is *Acer platanoides* and the common name is Norway maple. "Emerald Queen" may be included as the variety name, but variety names are not required.

- G. How well the exhibitor follows written directions is an important factor in judging.

D-320-SF1 DESIGN-YOUR-OWN EXHIBIT - Prepare an educational exhibit about some aspect of trees, forests, or forestry that is of special interest to you. Possible topics include paper recycling, wild fire, forest products, forest wildlife, or forest pests. The only requirement is that the display must be no larger than 24"x 24"x 24". Photographs, drawings, samples, charts, posters, etc. can be used, but include enough information to adequately explain the topic. Your display should be substantially different from other display classes. Be as creative as you like.

D-320-SF2 LEAF DISPLAY - The leaf display must include samples of "complete leaves" from at least 10 different tree species. The display must include at least two samples of simple leaves and compound leaves, conifer leaves. Leaves should be pressed, dried and mounted.

- A. **Collection:** Whenever possible, collect leaves from mature trees. Collect leaves any time after they have reached full size, usually beginning in early summer. Leaf samples should be in good condition and representative of the average leaves on the tree. Keep in mind that shaded leaves are often much larger than normal. Carefully remove leaves from the twig with the entire petiole or rachis (if compound) intact. All collection must be done by the exhibitor.
 1. After collection fresh leaf samples can be temporarily stored within the pages an old magazine but they should be properly pressed and dried for display. Be sure to record pertinent information during collection.
- B. **Mounting:** Leaves may be displayed in a notebook or on a display board. Any method may be used to mount leaves, e.g. wire, glue, tape, staples, plastic bags, but be sure all their features can be identified.
- C. **Labeling:** The label for each sample must include:
 1. common name
 2. scientific name
 3. leaf type
 4. leaf arrangement (for broadleaf trees)
 5. leaf composition (for broadleaf trees)
 6. collector's name
 7. collection date
 8. collection location (be specific, state and county at a minimum)

- a. If a twig is included with a sample, indicate “twig included” on the label. For example, the twig may be included with an eastern cedar sample because the leaves are very small and difficult to remove from the twig. Supplemental information, e.g. general uses, common products, fall color, etc., may be included with the display to enhance its educational value.

D-320-SF3 TWIG DISPLAY- The twig display must include twig samples from at least 10 different tree species. The display must include at least two samples of opposite and alternative leaf arrangements from broadleaf trees.

- A. Collection: Twig samples should be collected during the dormant season (November – April) when the buds are mature. Twig samples must be at least 6 inches long and exhibit buds. Leaves must be removed and side branches should be trimmed to less than one inch in length. All collection must be done by the exhibitor.
- B. Mounting: Twigs must be mounted on a display board. Any method, e.g. wire, glue, tape, staples, plastic bags, may be used to mount twigs, but be sure all features can be identified.
 1. The non-terminal end must be cut at a slant so the pith can be seen.
- C. Labeling: The label for each sample must include:
 1. common name
 2. scientific name
 3. leaf arrangement (for broadleaf trees)
 4. collector’s name
 5. collection date
 6. collection location (be specific, state and county at a minimum)
- D. Supplemental information, e.g. general uses, tree characteristics, etc., may be included with the display to enhance educational value.

D-320-SF4 SEED DISPLAY- The seed display must include seed samples from at least 10 different tree species.

- A. Collection: Tree seeds should be collected at the time of year when they are mature, which varies widely depending on tree species. For example, Silver maple seeds mature in May while red oak acorns do not mature until September. Seed samples should be free of insect or disease symptoms. Remember to display the seeds not fruit. For example, the seed from honey locust is enclosed in a pod. Remove and display the seed not just the pod. It is acceptable to display the fruit with the seed, but clearly label each. All collection must be done by the exhibitor.
- B. Mounting: Seeds may be displayed in a variety of ways, e.g. mounted on a display board, displayed in jars on a rack but they must be securely mounted and easily viewed. Be as creative as you like.
- C. Labeling: The labels for each sample must include:

1. common name
2. scientific name
3. type of fruit, if known (e.g. samara, pod, nut, etc.)
4. collector’s name
5. collection date
6. collection location (be specific, state and county at a minimum)

- D. Supplemental information, e.g. maturity date, average number of seed in the fruit, etc., may be included to enhance its educational value.

D-320-SF5 WOOD DISPLAY- The wood display must include wood samples from 10 different tree species.

- A. Preparation: Samples may be of any shape, e.g. sections from a board, wood cylinders turned on a lathe, horizontal or vertical cross sections of a small log with bark attached, etc., but all samples should be the same shape, e.g. all wood cylinders or sections of board. Each sample can be no larger than 4 inches by 4 inches by 4 inches. Cut surfaces should be sanded to show the grain. Treating samples with a clear finish (no stain) is optional. All collection must be done by the exhibitor.
- B. Mounting: Samples may be displayed in a variety of ways, e.g. mounted on a display board, displayed in jars on a rack but they must be securely mounted and easily viewed. Be as creative as you like.
- C. Labeling: The label for each sample must include:
 1. common name
 2. scientific name
 3. wood type (softwood or hardwood)
 4. collector’s name
 5. collection date
 6. collection location (be specific, state and county at a minimum)
- D. Supplemental information, e.g. common products, wood density, etc., may be included to enhance educational value.

D-320-SF6 CROSS-SECTION - Display a disc cut from a tree species listed in 4-H 332. The sample must be collected by the exhibitor within one year of the state fair judging date. The disc must measure 6 inches to 12 inches in diameter and 1 to 3 inches thick. The bark should be firmly attached, which may be difficult if the tree was dead when the disc was cut. Sand at least one side of the disc so the grain can be easily seen. If the disc is treated with a clear finish, both sides must be treated to minimize warping. As the disc dries, some cracking or checking can be expected and is allowed.

- A. Labeling: The following parts must be clearly and accurately labeled on the cross section with pins, paper tags, or some other form of identification:
 - A. pith
 - B. heartwood
 - C. sapwood

- D. one growth ring (beginning and end)
- E. cambium
- F. bark
 - 1. A separate label attached to the back of the disc must include:
 - a. common name
 - b. scientific name
 - c. tree classification (softwood or hardwood)
 - d. age (of the cross section)
 - e. collector's name
 - f. collection date
 - g. collection location (be specific, state and county at a minimum)

D-320-SF7 PARTS OF A TREE – (This project is only for ages 8 – 11).

- A. Prepare a poster, no larger than 24 inches x 24 inches, that clearly identifies the main external parts of any tree:
 - 1. Trunk
 - 2. Crown
 - 3. Roots
 - 4. Leaves
 - 5. Flowers
 - 6. Fruit
 - 7. Buds
 - 8. Bark
- B. Identifying other internal parts, e.g. phloem, xylem, cambium, annual ring, pith etc. is optional. Attach a separate label on the back of the poster that includes the exhibitor's name and age.

D-320-SF8 LIVING TREE - Display a living tree seedling grown by the exhibitor from seed in the display container. The seed must be from a species listed in 4H 332. The seedling must be 60 days to 1 year old (on State Fair judging day). The display container must contain at least 8" of soil (potting mix or suitable natural soil), have drainage hole(s), and a drain pan to catch drainage water.

- A. **Labeling:** A waterproof label must be attached and include:
 - 1. common name
 - 2. scientific name
 - 3. seed treatments (if any)
 - 4. planting date
 - 5. emergence date
 - 6. exhibitor's name.
- B. Supplemental information about the tree, e.g. where the seed was collected, growth measurements, uses for that species, etc. may be included in an attached notebook, poster, etc. to enhance educational value. Supplemental information will be an important factor in judging.

D-320-971 OTHER FORESTRY EXHIBIT

CONSERVATION & WILDLIFE

- A. **SHOW WHAT YOU DID AND LEARNED.** All exhibitors are encouraged to show evidence of their

personal field experiences, study, or observations that relate to their exhibit. This helps judges understand what the 4-Her did and learned in the process that led to the exhibit.

- B. **PROPER CREDIT.** Show proper credit by listing the sources of plans or other supporting information used in the exhibits.
- C. **WHOSE EXHIBIT?** The exhibitor's name, county, and age must be on the back or bottom of all displays so that the owner can be identified even if the entry tag becomes separated from the exhibit.
- D. **WILDLIFE AND WILDLIFE LAWS.** "Animal" or "wildlife" in the following instructions includes wild fish, amphibians, reptiles, birds, or mammals. Follow wildlife laws; example: wildlife laws do not allow collection of bird nests, eggs, or any of their parts.
- E. **ENTRIES PER INDIVIDUAL.** Each individual may enter one exhibit per class.
- F. **PROJECT MATERIALS.** Related project booklets include Exploring Your Environment Series, 4-H Shooting Sports, Amphibians, Bird Behavior (EC 5-93-81), Fishing for Adventure Project Manuals, Wildlife Conservation (4-H 125), and Outdoor Skills: Learning Science in the Outdoors series (Science Signature Outcome Program).
- G. **BOARD AND POSTER EXHIBITS-**These are displays that show educational information about a topic of interest. Board exhibits can hold objects such as fishing equipment or casts of animal tracks. Mount all board exhibits on plywood, Masonite, or similar panel no larger than 24 high by 24 wide. Poster exhibits should be on regular poster sheets, no larger than standard size (22 by 28 inches) but half size, 22 by 14 inches, is recommended.
- H. **SCORING-**Sample score sheets are available at your county extension office and on the UNL 4-H web page (<http://4h.unl.edu>).

For more ideas, refer to project booklets.

D-340-SF5 **WILDLIFE CONNECTIONS.** Board exhibit or poster. The purpose of this display is to show inter-connections and related aspects among animals, plants, and other habitat components. All displays should show two or more interactions (connections) that occur between/among animals or between animals and their habitat. Displays might show how

animals interact with other animals, people, or their habitat. Examples:

1. Food chain display. Use pictures, drawings, or other items to illustrate the source of food energy and where it goes—who eats whom or what. Use arrows to show the direction of the energy (food) flow.
2. Show the role of predators, scavengers, insect eaters, or others in nature.
3. Show how wildlife numbers (populations) change through the year.
4. Show predation, competition, or other behavioral interactions of wildlife.
5. Choose one kind of wildlife and make observations through a season or year, keep notes of interactions, then make a display of what you saw.

D-340-SF6 WILDLIFE TRACKS. Board or diorama-type box exhibit. Make a display of animal tracks using plaster-of-paris casts. There are three options. For all options, include a brief description of your experiences in making the tracks so the judge better understands what you did and learned. Positive casts (impressions as they would be in nature) are preferred, but not required.

- A. Option 1 should show plaster-of-paris tracks of five or more kinds of wildlife along with a picture or illustration of each kind of animal. OR
- B. Option 2 should show two or more plaster-of-paris track of one specific kind of wildlife and should include a picture or illustration of the animal, what the animal may eat, and what may eat the animal OR
- C. Option 3 should show two tracks and include the animal's habitat needs including preferred food, shelter, water, and space in addition to picture or illustration of the animal.

D-340-SF7 WILDLIFE KNOWLEDGE CHECK. Use electrical circuits, pictures, or other methods of teaching wildlife identification or other wildlife related knowledge. Plan size and shape to fit transportation and display maximum size 24 x 24 inches.

D-340-SF8 WILDLIFE DIORAMA. Box must be no larger than 24" x 24". The exhibit might show a grassland, prairie, agricultural, woodland, riparian (stream or river corridor), wetland, and/or other area with wildlife habitat. Exhibitor: show a large unbroken grassland or prairie for area-sensitive species such as meadow larks, greater prairie-chicken, lark bunting, grasshopper sparrows, Ferruginous hawk, burrowing owl, horned lark, upland sandpiper, or pronghorn; AND/OR show an area interspersed with several habitats such as windbreaks, farm fields, woods, waste areas, ditches, and pastures for edge-adapted species such as white-tailed deer, Northern bobwhite, ring-necked pheasants, mourning doves, cottontail rabbits, fox squirrels, Northern cardinals, or blue jays. Label the habitats displayed and show at least five kinds of wildlife in their proper habitats.

D-340-SF9 WILDLIFE ESSAY. Learn how to share educational information by writing. Choose a conservation or wildlife topic that interests you and write an essay about it. For example, write about a particular species of wildlife that you have observed or about the values of wildlife on a farm, in town, in a backyard, at a backyard feeder, or at other places. You might write about hunting, fishing, or ethics and proper behavior for hunting or fishing. The essay should be between 100 and 1000 words long and typed, double spaced 8-1/2 x 11" paper. You might use books, magazines, or personal interviews as resources, but you must give credit to all sources by listing them.

D-340-SF11 WILDLIFE ARTS. The purpose of this class is to allow artistic exhibits that contain educational information about conservation and wildlife. Examples might include paintings, photographs, wood carvings, or painted duck decoys, songs or poems written by the exhibitor. Entries must be appropriate for fair display and no larger than 24" x 24". For example, paintings or photographs should be displayed in notebook format or mounted on a sturdy display panel. All entries must include a title and brief explanation of the purpose or message (what is the exhibit meant to show).

 3. Any controlled substance.
- E-440-SF2 DISASTER KIT (Emergency Preparedness). A disaster kit must contain the materials to prepare a person or family for emergency conditions caused by a natural or man-made incident. Selection of materials is left up to the exhibitor. Family or group kits must have enough material or items for each person. A description of the kit's purpose, the number of people supported, and a list of individual contents is required. Youth are encouraged to challenge their family to try to survive using only the included materials for the designated time. If tested, share that experience in kit documentation. H-800-SF4 SPECIAL INTEREST OR ADVANCED INSECT DISPLAY. Educational display developed according to personal interests and/or advanced identification capability. This also is an opportunity to highlight favorite insects in a creative arrangement. Insects should conform to pinning and mounting standards as in Classes 1-3 and be protected in an insect box. Each specialty display should include names of the insects, interesting information about them, and why the display was made. Advanced identification collections should have insects grouped with labels that correspond with identification level (e.g. family, genus, species). A specialty collection may consist of insects by taxonomic group (e.g. butterflies, grasshoppers, dragonflies, scarab beetles) or by host, subject or habitat (e.g. insect pests of corn, aquatic insects, insect mimicry, insect galls, insects from goldenrod, insect pollinators, etc.).

H-800-SF5 INSECT HABITATS - Habitats consist of any hand-crafted objects, made of natural or artificial materials, placed outdoors, which promote or conserve insects in the environment. Insects may include bee pollinators, butterflies, beneficial insects, etc. A one-page report describing activities must accompany the exhibit.

H-800-SF6 MACROPHOTOGRAPHY - Subjects should be insects, spiders or other arthropods, or any nests, webs or constructions they make. All exhibit prints should be either 8" x 10" or 8½" x 11" and mounted on rigid, black 11" X 14" poster or mat board. Either orientation is acceptable. No frames or mat board framing is allowed. A caption of a few sentences should explain the subject and be printed on white paper and glued below the print on the poster board.

H-800-SF7 **INSECT POSTER/DISPLAY EXHIBITS** – Exhibits can be posters or three-dimensional displays, and artistic creativity is encouraged. Posters should be no larger than 22" x 28". They should be instructional and can be attractive and have pictures, drawings, charts, or graphs. Examples include life history and other facts about an insect; insect anatomy; how to manage insects in a farm, home, lawn, or garden setting; experiences rearing one kind of insect; survey of an important insect; insect behavior (ex. nesting, finding food, mobility, defenses, etc.); habitats (e.g. forests, grasslands, wetlands, rivers, or lakes) and what insects are found there, etc. Three-dimensional displays, such as dioramas, sculptures, models or decorative boxes should have a page of explanatory information accompanying them and fit within a 22" x 28" area.

H-800-SF8 **REPORTS OR JOURNALS** – Reports and journals should be in a 3-ring binder. A report may be informational, that is, an original article about a favorite insect, a history of insect outbreaks, diseases caused by insects, insects as food, etc. Or, it may be a research report about an investigation or experiment done in a scientific manner. It then should have a basic introduction of the insect studied, methods used, observations, and results of the project. Tables, graphs and images are helpful to include. A journal is an observational study over a period of time with personal impressions. It may cover watching changes in kinds of butterflies over the summer, rearing a specific insect from egg to adult, managing a bee hive, observations of insects in a specific habitat, accounts of insect behavior in a forest or flower garden, etc.

VETERINARY SCIENCE

DIVISION 840 - VETERINARY SCIENCE

Premium 5

The purpose of the Veterinary Science display is to inform the public regarding a common health problem of animals or a veterinary science principle. Do not confuse veterinary science exhibit topics with animal husbandry, history, or production topics.

A Veterinary Science exhibit may consist of a poster, notebook, or a display. The exhibit may represent material from any of the Veterinary Science projects including entry level exhibits from Unit 1.

If photographs are to be part of the exhibit, remember that they will be viewed by the public. Make sure that the photographs are in good taste and will not be offensive to anyone. Graphic photographs of excessive bleeding, trauma or painful procedures are not appropriate. For exhibits related to veterinary surgical procedures, aseptic

techniques need to be shown, for example, use of drapes, use of sterile procedures, wearing of gloves, and other appropriate veterinary medical practices.

1. **First-Aid Kits:** Because of public safety concerns and risk of theft of first-aid contents (veterinary Rugs/equipment) with perceived potential for drug abuse. **NO ANIMAL FIRST AID KITS WILL BE PERMITTED.** Animal first aid kits submitted will be immediately disqualified and not shown.
2. **Veterinary Science Posters:** This exhibit presents the viewer with a design that is simple and direct, unlike a display that usually presents more information. A poster should not exceed 22" x 28" and may be either vertical or horizontal.
3. **Veterinary Science Displays:** A display may include but is not limited to: a 3-dimensional exhibit, a scale model, the actual product (for example: skeleton; teeth; samples of leather, fur, or dried skin damaged by disease or parasites) or a notebook. A display is not a poster. A display may be mounted on poster board not to exceed 22" x 28" or on 1/4" plywood or equivalent that does not exceed 24" high or 32" wide or in a three ring binder or another bound notebook format.

Appropriate Veterinary Science Topics:

1. Maintaining health
2. Specific disease information
3. Photographic display of normal and abnormal characteristics of animals
4. Animal health or safety
5. Public health or safety
6. Proper animal management to ensure food safety & quality
7. Efficient and safe livestock working facilities
8. Or a topic of the exhibitors choosing related to veterinary medicine or veterinary science

Remember, since these are science displays, all references and information need to be properly cited. Proper sources include but are not limited to: Professional journals and publications, professional AVMA accredited websites, interviews with Veterinarians and excerpts from Veterinary Educational Literature

- A. Rockets must be supported substantially to protect the rocket from breakage. Rockets are to be mounted on base that has dimensions equal or less than 12" x 12" and the base should be 3/4" thick. No metal bases. If the rocket fins extend beyond the edges of the required base (12" x 12") then construct a base

that is large enough to protect the fins. The base is dictated by the size of the rocket fins. The rockets must be mounted vertically. Please do not attach sideboards or backdrops to the displays. In addition, a used engine or length of dowel pin is to be glued and/or screwed into the board and extended up into the rocket's engine mount to give added stability. Rockets must be equipped as prepared for launching, with wadding and parachute or other recovery system. **DO NOT ENTER** Rockets with live engines, wrong base size or sideboards (They will be disqualified at State Fair). A report, protected in clear plastic cover, must be included describing 1) rocket specification (including original or photo of manufacture packaging stating rocket skill level); 2) a flight record for each launching, (weather, distance, flight height); 3) number of launchings; 4) flight pictures; 5) Safety (how did you choose your launch site? Document safe launch, preparations, and precautions); 6) objectives learned; and 7) conclusions. The flight record should describe engine used, what rocket did in flight, and recovery success. Points will not be deducted for launching, flight or recovery failures described. This includes any damage that may show on the rocket. Complete factory assembled rockets will not be accepted. Judging is based upon display appearance, rocket appearance, workmanship, design or capabilities for flight, number of times launched, and report. Three launches are required to earn the maximum launch points given on the score sheets. For scoring for the State Fair, only actual launches count; misfires will not count towards one of the required three launches.

- B. For self-designed rockets only, please include a digital recorded copy of one flight. In the documentation please include a description of stability testing before the rocket was flown.
- C. Skill level of project is not determined by number of years in project. Skill level is determined by the level listed on the manufacturing packaging.
- D. 4-H Rocket project levels are not intended to correspond to National Association of Rocketry model rocket difficulty ratings or levels.
- E. High Power Rockets (HPR) is similar to model rocketry with difference that include the propulsion power and weight increase of the model. They use motors in ranges over "G" power and/or weight more than laws and regulations allow for unrestricted model rockets. These rockets are NOT appropriate for 4-H projects and will be disqualified.

WOODWORKING

DIVISION 911 - WOODWORKING

Premium 4

Wood Identification Display (wood sample blocks, finished, showing different types of wood) should be entered in Forestry. (Division 320)

The ability to build objects as designed by another person is an important life skill. Professional woodworkers often are hired to build objects to exacting specifications as laid out in a written plan.

REQUIREMENTS: All articles exhibited must include a plan (with drawings or sketch or blueprint) stating dimensions and other critical instructions a builder would need to know how to build the project. Plans may include narrative instructions in addition to the dimension drawings and include any alterations to the original plan. Part of the score depends on how well the project matches the plans. If the plans are modified, the changes made from the original need to be noted on the plans. All plans used for making the article must be securely attached and protected by a clear plastic cover.

All projects must have appropriate finish. If the project (i.e. picnic tables, wishing wells, swings, chairs, bridges, doghouses, etc.) is designed to be used outside, it will be displayed outside.

DIVISION 920 - WELDING

Premium 4

All welds exhibited in Class 1 or 2 must be mounted on a 12" x 15" long display board of thickness not to exceed 3/8". Attach each weld on a wire loop hinge or equivalent, so the judge can look at the bottom side of the weld when necessary. Each weld should be labeled with information stating:

1. type of welding process (stick, MIG, TIG, Oxy-Acetylene, etc.)
2. kind of weld,
3. welder setting,
4. electrode/ wire/ rod size
5. electrode/ wire / rod ID numbers.

Attach a wire to display board so it can be hung like a picture frame. If no plans are included with welding article or welding furniture, item will be disqualified.

All plans, plan alterations, and a bill for materials must be attached to the article. Protect plans with a cover. If project is designed to be outside it is required to have appropriate outdoor finish because project may be displayed outside.

H-920-SF4 WELDING FURNITURE – any furniture with 75% welding is used in the construction. 60% of item must be completed by 4-Her and notes regarding laser welding or machine welding must be included. This exhibit is not eligible for entry at the State Fair. In the notebook include: a) A photo (front and back) of the finished project. Also include detailed photographs of the project to allow judges to examine cuts. b) Instructions on how the design was created, this allows for replication of the project c) Lessons learned or improvements to the project.

4-H Welding Project Tips and Suggestions for Class 1 Welding Joints (above)

1. All welds should be made with the same electrode/wire/rod size and number.
2. Welds should be made only on one side of metal so penetration can be judged.
3. Welds should be cleaned with chipping hammer and wire brush. Apply a coat of light oil (penetrating oil) to the metal to prevent rusting. Wipe off excess oil.
4. It is suggested that all welds be on the same size and thickness of metal. These pieces, referred to as coupons, should be 1.5 to 2 inches wide and 3.5 to 4 inches long. A good way to get this size is to buy new cold rolled strap iron and cut to length. The extra width is needed to provide enough metal to absorb the heat from the welding process and prevent the coupons from becoming too hot before the bead is completed. Narrower coupons will become very hot, making an average welder setting too cold at the bead start, just right about the middle, and too hot at the end. The correct way to weld narrow strips is to make short beads and allow time to cool, however this project requires a full length bead.

A. Stick welding

1. Suggested coupon thickness - 1/4" if using 1/8" rod
2. Suggested rod - AC and DC straight or reverse polarity - first E-7014, second E-6013

B. Mig welding

1. Suggested coupon thickness - 1/4" if using .035 wire and 1/8" if using .023 wire

C. Oxy-Acetylene

1. Suggested coupon thickness - 1/8"
2. Suggested rod - 1/8" mild steel rod

4-H Welding Project Tips and Suggestions for Class 2 Position Welds

1. It is suggested that all welds be on the same size and thickness of metal. These pieces are referred to as coupons. The welds can be on one coupon that is about 4"x4" or on individual coupons that are about 2"x4" and 1/4" thick. Suggested rods for this class of position welds for AC and DC straight or reverse polarity is, first E-6013, second E-7014 and E-6010 for dc reverse polarity only.
2. Welds should be cleaned with chipping hammer and wire brush. Apply a coat of light oil (penetrating oil) to the metal to prevent rusting. Wipe off excess oil.

4-H Welding Project Tips and Suggestions for Class 3 and 4 Welding Article

1. All welds should be cleaned and protected from rust with paint or light oil. Plans are to be complete enough that if they were given to a welding shop, the item could be made without further instructions. Bill of materials should include a cost for all items used including steel, electrodes, paint, wheels, etc.

DEPARTMENT C QUILT QUEST

DIVISION 229 - QUILT QUEST

Premium 5 for classes SF10-SF30 and classes 982-984

Premium 2 for classes SF40-SF83 and 980-981

In Quilt Quest, 4-Hers learn skills as they progress through the project. The least experienced 4-H exhibitor will select fabric, cut, and sew together only squares or rectangles in making the quilt top. They may have additional guidance in piecing the quilt block and layering together the quilt top, inner batting and the quilt bottom. Another person can do the quilting for them.

In the Premier class, the 4-Her has developed skills to be able to do all of the work by himself/herself. This includes pattern and fabric selection, cutting and sewing individual pieces, layering the quilt top/batting/backing together, and quilting. Quilting may be done by hand, by sewing machine or by a commercial-grade quilting machine. After quilting, the 4-Her must finish the quilt by "squaring it up," put binding on the edge, and placing a label on the quilt which provides details about the quilt making process for historical purposes.

All entry cards and support information must be attached using a safety pin. **No straight pins.**

When judging Quilt Quest exhibits, the judges consider SF209 "Standards for Judging Quilts and Quilted Items."

For all classes, 4-Hers can choose fabrics for the quilt by selecting fabric from fabric bolts. 4-Hers may also use "fabric collections" offered by manufacturers in a particular designer or fabric line. Examples of fabric collections include:

- Jelly Rolls are made of (up to) 40 different strips of 2 ½" wide fabric laying on top of one another and rolled up to look like a jelly roll. The fabric is created by one designer or fabric line and compliments each other. In many cases, less skilled 4-Hers find it difficult to cut narrow strips with a rotary cutter and ruler, so this fabric selection may make it easier as they learn.
- Honey Buns are made like the Jelly Rolls with 1 ½" strips of fabrics.
- Layer Cakes are 10" squares of fabric from a manufactured designer or fabric line with different pieces of fabric "layered" on top of one another to look like a piece of cake.
- Charm Packs are made of 5" squares of coordinating fabric and may be tied up with a string or scrap of fabric.
- Candies are 2 ½" squares of fabric from a manufactures designer or fabric line.
- Turnover is a collection of coordinating fabrics that are cut into 6" triangles.
- Fat Quarters are ½ yard cuts of fabric which are cut in half to make a rectangle that is approximately 18" x 21". (One half yard of fabric yields 2 fat quarters). The "fat quarter" can be more economical to purchase for a smaller quilt because the purchaser does not have to buy the entire yardage width.
- Fabric Kit is a collection of fabrics cut in large pieces to accommodate the requirements of a particular quilt pattern. The 4-Her must cut out all of the smaller squares, rectangles, etc. to make the quilt top according to the pattern directions.

After fabric selection, youth can use a variety tools for cutting the fabric and completing the quilt. Cutting into pattern pieces may include hand roller die cutting machines that cut particular shapes which can be applied to fabric. This is allowed in the construction of the quilt.

- A quilted exhibit is made up of at least 3 layers. Exhibits must be quilted or tied through all layers.
- Fleece blankets are not eligible in this division.
- Quilts must have a permanent label on the back in the bottom right corner with quilter's name and date of completion.

C-229-SF10 EXPLORING QUILTS - Illustrate some aspect of quilts or quilt making. Examples include, but are not limited to, language arts, quilts of different cultures, chemistry, design, preservation, history, construction, math conversion of patterns, textiles/fabrics, computerization, and

entrepreneurship. History may include history of an old quilt or a newly made quilt, or history/research of a particular style of quilt such as Baltimore album quilts or Amish quilts. Exhibit may be 14x22 inch poster, notebook, CD, Power point, Prezi, DVD, YouTube, or other technique. All items must be attached to the exhibit and labeled. No quilted items should be entered in this class.
