4-H LIVESTOCK PREMIUM SALE

Superintendent Krystl Knabe

The 4-H Livestock Premium Sale is a promotional activity for the Cass County 4-H Program. Hopefully, the 4-H member will view the premium sale as an opportunity to show the county his/her achievements in the livestock project. This premium sale is for market livestock only.

- All market animals to be in the sale must be consigned to the sale by 30 minutes following their show. Market beef, sheep, swine, and meat goat exhibitors putting their animals in the premium sale will sell them as premium only, meaning dollars per head not cents per pound. Exhibitors will have the choice of retaining ownership or shipping the animal for sale. Exhibitors retaining ownership will only receive the premium from the premium sale. Exhibitors of shipped animals will receive the premium from the buyer in addition to the sale proceeds from the buyer of the animal. Premium sale buyers of animals eligible for sale will still have the opportunity of purchasing it for the base bid per pound times the animal's weight in addition to the premium bid on the sale.
- Owners of animals participating in the premium sale are to be at their pens and/or stalls to take the animals through the sale ring. If they are not present, the animal will not be sold. You must bring your own animal to the ring unless arrangements are made with the 4-H Council prior to the Cass County Fair entry date.
- Sale weight will be the weigh-in weights. No re-weighs allowed.
All 4-H members must wear official 4-H shirts when taking their animals through the 4-H premium sale.
- Each exhibitor is allowed to sell one (1) animal of each species
- Any 4-H project animal that has been offered for sale where the intent of the sale is change of ownership, is ineligible for the 4-H Livestock classes at the Nebraska State Fair.
- Only Fryer Class rabbits (G-083-980 and G-083-981) are allowed to participate in the premium sale.

ROUND ROBIN SHOWMANSHIP

Superintendent Matt Hammer

Friday August 9, 4:00 p.m., Livestock Show Ring

The Contest will consist of five, ten-minute stations (each of the species) plus three minutes in between stations (to allow exhibitors to get to the next station and ready to show). The contest will begin with a livestock production and quality assurance exam for all involved species. Exhibitors will use their own animals unless permission is given by a round robin superintendent.

General Information: The contest will consist of ten exhibitors, two from each of the following senior showmanship areas: beef, sheep, swine, meat goat, horse. The contest gives 4-H exhibitors a chance to learn about other species of livestock and develop camaraderie and dialogue between exhibitors of different livestock species. The hope is that the showmen will take the time to learn about the other species, they will show in the round robin. Their knowledge will be tested through an exam that will factor into their final score. Judging will be based on ring etiquette, awareness of the judge, answering judge's questions, ability to follow instruction, and appearance in the ring.

All youth will meet at the horse arena after taking their exam and do all horse rounds first. The other rounds will follow in the livestock arena.

Each showman is responsible for supplying their animal and all items necessary to show that animal.

Choosing Exhibitors: Senior showmen will be chosen through their respective livestock showmanship classes. The senior champion and reserve showman are eligible for the round robin competition. If a senior showmanship winner does not wish to participate in round robin, the third-place senior winner will be asked to participate. If the third-place winner declines, the next senior purple ribbon winner will be asked. If all purple ribbon senior showmen decline, the champion intermediate showman will be invited to participate. If an exhibitor wins or receives a reserve place in more than one species showmanship class, they will choose the species they would like to represent. In this instance, another exhibitor will be chosen for the area(s) in the same manner as if an exhibitor would turn down the opportunity. The winner will represent Cass County in the State Fair Elite Showman Contest.

Each 4-H member is limited to one exhibit per class. If more than one item per class is entered, they will be judged and displayed but no premium will be awarded. Static exhibits must receive a purple ribbon at county fair to be considered for State Fair.

GENERAL INFORMATION

- The name and county of each exhibitor should appear separately on the back of each board, article, and set of plans so owners of an exhibit may be identified if the entry tag is separated from the exhibit.
- Several classes require a display board which should be a height of 24" and not to exceed 1/4" in thickness. A height of 23 7/8 inches is acceptable to allow for the saw kerf if two 24" boards are cut from one end of a 4'x 8' sheet of plywood. Nothing should be mounted within 3/4" of the top or bottom of the board.
- Fabricated board such as plywood, composition board, or particle-type lumber may be used for demonstration displays.
- Demonstration boards should be sanded and finished to improve their appearance. The finish on a demonstration board will be judged as a woodworking exhibit.
- Demonstration boards should include an overall title for the display, plus other necessary labeling.
- All reports should be clearly written or typed and enclosed in a clear, plastic cover. The reports should be attached securely to the display.

CONSERVATION, WILDLIFE & SHOOTING SPORTS

Conservation, wildlife and shooting sports gives 4-H members an opportunity to share their knowledge and field experience about conservation, wildlife, and shooting sports. When creating an exhibit make sure to take close account of the rules while taking into account the different laws that surround those areas.

Rules

- 1. Show What You Did and Learned:** All exhibitors must show evidence of their personal field experiences, study or observations that relate to their exhibit. This helps judges understand what the 4-H'er did and learned in the process that led to the exhibit.
- 2. Proper Credit:** Show proper credit by listing the sources of plans or other supporting information used in exhibits.
- 3. Whose Exhibit?:** The exhibitor's name, county, and age must be on the back or bottom of all displays.
- 4. Wildlife and Wildlife Laws:** "Animal" or "wildlife" in the following classes includes wild fish, amphibians, reptiles, birds, or mammals. Please make sure you are following all wildlife laws. Domestic animals and insect exhibits are not appropriate for this area.
- 5. Project Materials:** Related project booklets include Exploring Your Environment Series, 4-H Shooting Sports, Amphibians, Bird Behavior (EC 59381), Fishing for Adventure Project Manuals, Wildlife Conservation (4-H 125), Geology, and Outdoor Adventure. Other resources include: Outdoor Skills: Learning Science in the Outdoors series (Science Signature Outcome Program) outdoornebraska.gov/afterschool/ and www.whep.org.
- 6. Board and Poster Exhibits:** Mount all board exhibits on 1/4" plywood, Masonite, or similar panel no larger than 24" high by 24" wide. Poster exhibits should be on regular poster sheets, no larger than standard size (22 by 28 inches) but half size, 22 by 14 inches, is recommended.

Example to attach to your exhibit

Name: Chris Clover

County: Clover County

Age: 10

Field Experience, Study, or Observations:

I attended a 4-H workshop where we put out a food plot, and then made turkey calls. We played a game about attracting turkeys. Sometimes we acted like a female to draw in a tom turkey. Sometimes we acted like a lost baby turkey to call in a whole flock. I was able to use my turkey call and play the game successfully. While I never turkey hunted in person, I went on-line to research more turkey calls. I hope to turkey hunt someday, and I want to use a box call to hunt fall turkeys.

Safety (how did you choose your launch site? Document safe launch, preparations, and precautions) 6 objectives learned and 7) conclusions.
6. The flight record should describe engine used, what the rocket did in flight and recovery success. Points will not be deducted for launching, flight or recovery failures described. This includes any damage that may show on the rocket. Complete factory assembled rockets will not be accepted at the State Fair.
7. Judging is based upon display appearance, rocket appearance, workmanship, design or capabilities for flight, number of times launched and report. Three launches are required to earn the maximum launch points given on the score sheets. For scoring for the State Fair, only actual launches count, misfires will not count towards one of the required three launches.

4-H Welding Project Tips and Suggestions for Class 1 Welding Joints (above)

1. All welds should be made with the same electrode/wire/rod size and number.
2. Welds should be made only on one side of metal so penetration can be judged.
3. Welds should be cleaned with chipping hammerand wire brush. Apply a coat of light oil (penetrating oil) to the metal to prevent rusting. Wipe off excess oil.
4. It is suggested that all welds be on the same size and thickness of metal. These pieces, referred to ascoupons, should be 1½" to 2" wide and 3½" to 4" long. A good way to get this size is to buy new cold rolled strap iron and cut to length. The extra width is needed to provide enough metal to absorbthe heat from the welding process and prevent the coupons from becoming too hot before the bead is completed. Narrower coupons will become very hot, making an average welder setting too cold at the bead start, just right about the middle, and too hot at the end. The correct way to weld narrow strips is to make short beads and allow time to cool, however this project requires a full length bead.

A. Arc (stick) welding

- Suggested coupon thickness - ¼" if using ⅛" rod.
- Suggested rod - AC and DC straight or reverse polarity - first E-7014, second E-6013

B. MIG welding

- Suggested coupon thickness - ¼" if using .035 wire and ⅛" if using .023 wire.

C. Oxy-Acetylene

- Suggested coupon thickness - ⅛"
- Suggested rod - ⅛" mild steel rod

4-H Welding Project Tips and Suggestionsfor Class 2 Position Welds

- A. It is suggested that all welds be on the same size and thickness of metal. These pieces are referred to as coupons. The welds can be on one coupon that is about 4" x 4" or on individual coupons that are about2" x 4" and ¼" thick. Suggested rods for this class of position welds for AC and DC straight or reverse polarity is, first E-6013, second E-7014 and E-6010 for dc reverse polarity only.
- B. Welds should be cleaned with chipping hammer and wire brush. Apply a coat of light oil (penetrating oil)to the metal to prevent rusting. Wipe off excess oil.

4-H Welding Project Tips and Suggestionsfor Class 3 and 4 Welding Article

- A. All welds should be cleaned and protected from rust with paint or light oil. Plans are to be complete enough that if they were given to a welding shop, the item could be made without further instructions. Bill of materials should include a cost for all items used including steel, electrodes, paint, wheels, etc.

H-107-974 ALL OTHER GENERAL AREAS PROJECTS

H-107-975 GENERAL AREAS FLOP

HOME DESIGN & RESTORATION

DEPARTMENT C HOME DESIGN & RESTORATION

Superintendent Krystl Knabe

Individuals are allowed only one entry per class number. If more than one item per class is entered, they will be judged and displayed but no premium will be awarded.

Only exhibits receiving purple ribbons are eligible to be selected for State Fair.

SUPPORTING INFORMATION - Supporting information is required for all Home Design & Restoration exhibits.

Information must include elements or principles of design used and steps taken to complete project. Tag templates can be found at the 4-H State Fair website: <http://4h.unl.edu/fairbook#tab3> Exhibits without supporting documentation will be dropped a ribbon placing.

STATE FAIR EXHIBITS - Holiday decorations and pre-packaged kits may be exhibited at the county fair but will not be eligible for the State Fair. Kits are defined as any prepackaged item where the materials and the design are predetermined by the manufacturer. Articles that use patterns or pictures from magazines as starting points are acceptable. Sending delicate, breakable, or valuable items to State Fair is discouraged.

IDENTIFICATION - An entry tag which includes a clear description of the entry must be securely attached to the Home Environment Exhibit. Use color, pattern, or picture descriptions to aid in identification. No straight pins. In addition to the entry tag, a label with the exhibitors, name and county should be attached to each separate piece of the exhibit.

YOU BE THE TEACHER EXHIBITS - This exhibit is designed to share with others what the 4-Her learned in the project. Exhibit may be a poster, three-dimensional display, scrapbook charts, pictures, photographs, a file of ideas, research study, etc. Posters should be approximately 28" x 22". A display may not exceed a total space of 12" deep, 15" wide and 10" high.

HOME DESIGN & RESTORATION EXHIBITS are evaluated by these criteria:

- Items must be designed to be used for home decorating, home furnishing, or home management (no clothing, purses, note cards, scrapbooks/photo albums, etc.)
- Accessories should be of high quality (as compared to quick, simple crafts), suitable for use in the home several months throughout the year. Holiday specific items are discouraged. Exhibits made from kits are also discouraged as kits limit decision making in the design process.
- Items should show creativity and originality, along with the application of design elements and principles. Youth are required to include the design elements and principles they used along with simple explanation of how they designed their project with their exhibit. Information on the elements and principles of design may be found in the Design Decisions manual, as well as Portfolio Pathways and Sketchbook Crossroads.
- Entered in correct class: What medium was changed or manipulated? What medium is a majority of your exhibit made from?
- Items should be ready for display in the home- pictures framed, wall hangings and pictures ready to hang, etc. No single mat board or artist canvas panels allowed. Wrapped canvas (if staples not visible on edge) is accepted without framing. Make sure hangers are strong enough to support the item. Command strips are not adequate hangers. Items not ready for display will be dropped one ribbon placing.
- Only purple ribbons are eligible for Champion or Reserve Champion placing.
- Items should not be ones made for beginning level or other projects (ex: simple (10 minute) table runners, or woodworking). Exhibits from the beginning level project, Design My Place, are county only and not state fair eligible.

DIVISION 229 - QUILT QUEST

Premium 3

In Quilt Quest, 4-Hers learn skills as they progress through the project. The least experienced 4-H exhibitor will select fabric, cut, and sew together only squares or rectangles in making the quilt top. They may have additional guidance in piecing the quilt block and layering together the quilt top, inner batting, and the quilt bottom. Another person can do the quilting for them.

In the Premier class, the 4-Her has developed skills to be able to do all the work by himself/herself. This includes pattern and fabric selection, cutting and sewing individual pieces, layering the quilt top/batting/backing together, and quilting. Quilting may be done by hand, by sewing machine or by a commercial-grade quilting machine.

After quilting, the 4-Her must finish the quilt by "squaring it up," put binding on the edge, and placing a label on the quilt which provides details about the quilt making process for historical purposes.

All entry cards and support information must be attached using a safety pin. No straight pins.

When judging Quilt Quest exhibits, the judges consider SF209 "Standards for Judging Quilts and Quilted Items."

For all classes, 4-Hers can choose fabrics for the quilt by selecting fabric from fabric bolts. 4-Hers may also use "fabric collections" offered by manufacturers in a particular designer or fabric line. Examples of fabric collections include:

- Jelly Rolls are made of (up to) 40 different strips of 2 ½" wide fabric laying on top of one another and rolled up to look like a jelly roll. The fabric is created by one designer or fabric line and compliments each other. In many cases, less skilled 4-Hers find it difficult to cut narrow strips with a rotary cutter and ruler, so this fabric selection may make it easier as they learn.
- Honey Buns are made like the Jelly Rolls with 1 ½" strips of fabrics.
- Layer Cakes are 10" squares of fabric from a manufactured designer or fabric line with different pieces of fabric "layered" on top of one another to look like a piece of cake.
- Charm Packs are made of 5" squares of coordinating fabric and may be tied up with a string or scrap of fabric.
- Candies are 2 ½" squares of fabric from a manufacture designer or fabric line.
- Turnover is a collection of coordinating fabrics that are cut into 6" triangles.
- Fat Quarters are ½ yard cuts of fabric which are cut in half to make a rectangle that is approximately 18" x 21". (One half yard of fabric yields 2 fat quarters) The "fat quarter" can be more economical to purchase for a smaller quilt because the purchaser does not have to buy the entire yardage width.
- Fabric Kit is a collection of fabrics cut in large pieces to accommodate the requirements of a particular quilt pattern. The 4-Her must cut out all the smaller squares, rectangles, etc. to make the quilt top according to the pattern directions. After fabric selection, youth can use a variety of tools for cutting the fabric and completing the quilt. Cutting into pattern pieces may include hand roller die cutting machines that cut particular -shapes which can be applied to fabric. This is allowed in the construction of the quilt.
- A quilted exhibit is made up of at least 3 layers. Exhibits must be quilted or tied through all layers.
- Fleece blankets are not eligible in this division.
- Quilts must have a permanent label on the back in the bottom right corner with quilter's name and date of completion.

DEPARTMENT H VETERINARY SCIENCE

DIVISION 840 - VETERINARY SCIENCE

Premium 3

The purpose of the Veterinary Science display is to inform the public regarding a common health problem of animals or a veterinary science principle or public health/zoonotic diseases. Do not confuse veterinary science exhibit topics with animal husbandry, history, or production topics.

A Veterinary Science exhibit may consist of a poster, notebook, or a display. The exhibit may represent material from any of the Veterinary Science projects including entry level exhibits from Unit 1.

If photographs are to be part of the exhibit, remember that they will be viewed by the public. Make sure that the photographs are in good taste and will not be offensive to anyone. Graphic photographs of excessive bleeding, trauma or painful procedures are not appropriate. For exhibits related to veterinary surgical procedures, aseptic techniques need to be shown, for example, use of drapes, use of sterile procedures, wearing of gloves, and other appropriate veterinary medical practices.

1. First-Aid Kits: Because of public safety concerns and risk of theft of first-aid contents (veterinary Rugs/equipment) with perceived potential for drug abuse, animal first aid kits containing any drugs or medications will be immediately disqualified and not displayed. First Aid kits wishing to include medication information should instead utilize written descriptions, photographs, drawings, computer generated print outs, or empty packaging of pharmaceuticals.

2. Veterinary Science Posters: This exhibit presents the viewer with a design that is simple and direct, unlike a display that usually presents more information. A poster should not exceed 22" x 28" and may be either vertical or horizontal.

3. Veterinary Science Displays: A display may include but is not limited to; a 3-dimensional exhibit, a scale model, the actual product (for example: skeleton; teeth; samples of leather, fur, or dried skin damaged by disease or parasites) or a notebook. A display is not a poster. A display may be mounted on poster board not to exceed 22" x 28" or on ¼" plywood or equivalent that does not exceed 24" high or 32" wide or in a three-ring binder or another bound notebook format.

Appropriate Veterinary Science Topics:

- Maintaining health
- Specific disease information
- Photographic display of normal and abnormal characteristics of animals
- Animal health or safety
- Public health or safety
- Proper animal management to ensure food safety & quality.
- Efficient and safe livestock working facilities.
- Or a topic of the exhibitors choosing related to veterinary medicine or veterinary science.

Remember, since these are science displays, all references and information need to be properly cited. Proper sources include but are not limited to: Professional journals and publications, professional AVMA accredited websites, interviews with Veterinarians and excerpts from Veterinary Educational Literature. Plagiarism will result in a disqualification. Please study your topic and present the information to your audience in your own words.

Refer to Scoresheet SF264. Grain exhibits must be one gallon per sample. Grain exhibits harvested in the fall (e.g., corn or soybeans) may be from the previous year's project and brought in an appropriate sized box/container for display. Display containers will be furnished. NEW: Place in a clear container so it can be viewed and displayed.

DEPARTMENT G HORTICULTURE

If more than one item per class is entered, they will be judged and displayed but no premium will be awarded. All static exhibits must have received a purple ribbon at the county fair to advance to the State Fair.

GENERAL INFORMATION:

The valid cultivar or variety name must be included on all entry cards. Proper identification is the responsibility of the exhibitor. A perennial is defined as a plant of which the crown overwinters. An annual is a plant that grows from seed each season, whether self-seeded or planted by the gardener.

A biennial is a plant that germinates, grows, and overwinters as a crown, blooms the following year, and dies. Foliage will be considered when exhibit is judged.

Use plain jars or bottles for cut flower entries. Cut flower containers will not be judged. All 3 or 5 stems of cut flowers should be the same cultivar and color, do not mix cultivars and colors.

In classes 23, 44, & 45 do not duplicate entries with the classes listed by using other cultivars or varieties. For example: 4-Hers with two cultivars or varieties of marigolds can only enter the marigold class and cannot enter the other cultivar or variety in any other class. Follow the guidelines in 4-H "Preparing Cut Flowers for Exhibits" 4H227 (revised 7/20/12) (Free Download - <http://4h.unl.edu/preparingcutflowers> when preparing entries for the fair.

EDUCATIONAL EXHIBITS

G-773-290 GARDEN PROMOTION POSTER (SF103)

Individual poster promoting vegetable or herb gardening, size 14" x 22" either vertical or horizontal arrangement. Posters may be in any medium so long as they are not 3-dimensional. Posters using copyrighted material will not be accepted. Entry card must be attached to the upper right-hand corner. The 4-H member's name, age, county, and years in the project(s) must be on the back of the poster.

G-773-291 EDUCATIONAL VEGETABLE OR HERB GARDEN POSTER (SF104)

Prepare a poster 14" x 22" x 2" (3-dimensional if needed) either vertical or horizontal arrangement illustrating a skill or project you have done or learned about in a 4-H vegetable gardening project. You might show a special technique you use or equipment you have incorporated in your garden (drip irrigation system, composting, or special techniques learned). Refer to 4-H horticulture project manuals but use your own creativity. Entry card must be stapled to the upper right-hand corner. The 4-H member's name, age, county, and years in the project(s) must be on the back of the poster.

G-773-292 VEGETABLE AND/OR HERB GARDENING HISTORY INTERVIEW (SF105)

Neatly handwritten account of a gardening history interview of someone whose vegetable or herb garden has inspired you. Maximum of 4 pages of text and 2 pages of pictures (include 1 picture of the person you interviewed) of their garden if the individual is still gardening. Protect with a clear report cover or 3-ring notebook. The 4-H member's name, age, and county must be on the back of the report.

G-773-293 VEGETABLE SEED DISPLAY (SF101)

Each display must include seeds representing the following families: Cucurbit, Brassica (cabbage), Solanaceous (nightshade), and Legume (pea) families plus representatives from 5 other families. Group the seeds by family and type. Glue seeds or otherwise fasten clear containers of seeds to a board or poster mat board no larger than 22" x 24". Label each group and each individual vegetable type with the common and scientific names. Use only one variety or cultivar of each vegetable, except for beans where several examples of beans may be shown. Attach a card to the back of the display explaining why and how it is important to know which vegetables are related, and site references on where the scientific name information was found. The 4-H member's name, age, county, and years in the project(s) must be on the back of the display.

WORLD OF VEGETABLES NOTEBOOK (SF102)

G-773-294 Choose a favorite foreign cuisine and learn what vegetables and/or herbs are common to it (Mexican, African, Chinese, Italian, etc.). Include a report explaining about a minimum of 5 vegetables and/or herbs from each country chosen. Include the scientific and common names; pictures of the plants from your garden or seed catalogs; tell how they are grown; and how the foods are used. Also list a source for buying the seed or plants. Favorite recipes using some or all the vegetables described may be included. Give proper credit by listing the sources of pictures and information used. Protect in a clear report cover or small 3-ring notebook. The 4-H member's name, age, years in the project, and county must be on the back cover of the report.

DIVISION 775 - SPECIAL GARDEN PROJECT

G-775-001 STATE FAIR SPECIAL GARDEN PROJECT EDUCATION EXHIBIT

The current year's Special Garden Project fresh cut flowers or harvested vegetables should be entered in this class. Refer to classes 1-45 in (SF Book) for quantity to exhibit if Special Garden Project is a fresh cut flower (SF106). Refer to classes 201-252 for quantity to exhibit if Special Garden Project is a vegetable (SF108)

FORESTRY

FORESTRY DIVISION 320

Premium 3

GENERAL INFORMATION: The official reference for all forestry projects is Tree Identification Manual (4-H 332) which was recently revised and is available for purchase from UNL Marketplace. Other helpful forestry references include "Trees of Nebraska" (EC 92-1774-X) "Leafing Out" (4-H431), and "Plant a Tree" (EC 17-11- 80).

- Display "boards" must be made from wood or wood composite, ¼" to ½" thick and no larger than 24" x 24".
- Display boards may be coated, painted, varnished or equivalent to prevent warping.
- Display "posters" must be made from a material, foam board or poster board that will stand upright and be no larger than 24"x 24".
- Display "books" must measure no more than 16"x16". At least 5 of the 10 samples in Classes 2, 3, 4, and 5 must be from the list of 60 species described in 4-H 332. Samples must be from 10 different tree species. For example: Emerald Queen Maple and Crimson King Maple are both varieties of the same species (Norway Maple), and thus have the same genus and species name - *Acer platanoides*. All samples must be from trees, No shrubs. If more than 10 samples are included in the display, only the first 10 samples from the current year will be judged.

Remember that other general labeling standards apply. For example: scientific names are always italicized or underlined. Also, the first letter of a Genus name is always capitalized. The first letter of a species name is always lower case. When required, always indicate complete scientific names (Genus and species) and common names, (Norway Maple) even when "variety names" are included. For example: the scientific name of Emerald Queen Maple is *Acer platanoides* and the common name is Norway maple. "Emerald Queen" may be included as the variety name, but variety names are not required.

D-320-001 DESIGN YOUR OWN EXHIBIT

Prepare an educational exhibit about some aspect of trees, forests, or forestry that is of special interest to you. Possible topics include paper recycling, wildfire, forest products, forest wildlife, or forest pests. The only requirement is that the display must be no larger than 24" x 24" x 24". Photographs, drawings, samples, charts, posters, etc. can be used, but include enough information to adequately explain the topic. Your display should be substantially different from other display classes. Be as creative as you like.

D-320-002 LEAF DISPLAY

The leaf display must include samples of "complete leaves" from at least 10 different tree species. The display must include at least two samples of simple leaves, compound leaves, and conifer leaves. Leaves should be pressed, dried, and mounted.

- **Collection:** Whenever possible, collect leaves from mature trees. Collect leaves any time after they have reached full size, usually beginning in early summer. Leaf samples should be in good condition and representative of the average leaves on the tree. Keep in mind that shaded leaves are often much larger than normal. Carefully remove leaves from the twig with the entire petiole or rachis intact. After collection, fresh leaf samples can be temporarily stored within the pages of an old magazine, but they should be properly pressed and dried for display. Be sure to record pertinent information during collection. All collection must be done by the exhibitor.
- **Mounting:** Leaves may be displayed in a notebook or on a display board. Any method may be used to mount leaves, e.g. wire, glue, tape, staples, plastic bags, but be sure all their features can be clearly identified.
- **Labeling:** The label for each sample must include: 1. common name 2. scientific name 3. leaf type 4. leaf arrangement (for broadleaf trees) 5. leaf composition (for broadleaf trees) 6. collector's name 7. collection date 8. collection location (be specific, state and county at a minimum) If a twig is included with a sample, indicate "twig included" on the label. For example, the twig may be included with an eastern red cedar sample because the leaves are very small and difficult to remove from the twig.
- **Supplemental information:** e.g. general uses, common products, fall color, etc., may be included to enhance educational value.

D-320-003 TWIG DISPLAY

The twig display must include twig samples from at least 10 different tree species. The display must include at least two samples of opposite and alternate leaf arrangements from broadleaf trees.

- **Collection:** Twig samples should be collected during the dormant season (November – April) when the buds are mature. Twig samples must be at least 6 inches long and exhibit buds. Leaves must be removed and side branches must be trimmed to less than 1 inch in length. All collection must be done by the exhibitor.
- **Mounting:** Twigs must be mounted on a display board. Any method, e.g. wire, glue, tape, staples, plastic bags, etc., may be used to mount twigs, but be sure all features can be clearly identified. The non-terminal end must be cut at a slant so the pith can be seen.
- **Labeling:** The label for each sample must include: 1. common name 2. scientific name 3. leaf arrangement (for broadleaf trees) 4. collector's name 5. collection date 6. collection location (be specific, state and county at a minimum)
- **Supplemental information:** e.g. general uses, tree characteristics, etc., may be included to enhance educational value.

D-320-004 SEED DISPLAY

- **Collection:** Tree seeds should be collected at the time of year when they mature, which varies widely depending upon tree species. For example, Silver maple seeds mature in May while red oak acorns do not mature until September. Seed samples should be free of insect or disease symptoms. Remember to display seeds, not fruit. For example, the seed of honeylocust is enclosed in a pod. Remove and display the seed, not just the pod. It is acceptable to display the fruit with the seed, but clearly label each. All collection must be done by the exhibitor.
- **Mounting:** Seeds may be displayed in a variety of ways, e.g. mounted on a display board, displayed in jars in a rack, etc., but they must be securely mounted and easily viewed. Be as creative as you like.
- **Labeling:** The label for each sample must include: 1. common name 2. scientific name 3. type of fruit, if known (e.g. samara, pod, nut, legume, etc.) 4. collector's name 5. collection date 6. collection location (be specific, state and county at a minimum)
- **Supplemental information:** e.g. maturity date, average number of seed in the fruit, etc., may be included to enhance educational value.

D-320-005 WOOD DISPLAY

The wood display must include wood samples from at least 10 different tree species.

- **Preparation:** Samples may be of any shape, e.g. sections from a board, wood cylinders turned on a lathe, horizontal or vertical cross-sections of a small log with bark attached, etc., but all samples should be the same shape, e.g. all wood cylinders or all sections of a board. Each sample can be no larger than 4 inches by 4 inches by 4 inches. Cut surfaces should be sanded to show the grain. Treating samples with a clear finish (no stain) is optional. All collection must be done by the exhibitor.
- **Mounting:** Samples may be displayed in a variety of ways, e.g. mounted on a display board, displayed in a box or rack, etc., but they must be securely mounted and easily viewed. Be as creative as you like.
- **Labeling:** The label for each sample must include: 1. common name 2. scientific name 3. wood type (softwood or hardwood) 4. collector's name 5. collection date 6. collection location (be specific, state and county at a minimum)
- **Supplemental information:** e.g. common products, wood density, etc., may be included to enhance educational value.

D-320-006 CROSS-SECTION

A disc cut from a tree species listed in 4H 332. The sample must be collected, by the exhibitor, within one year of the state fair judging day. The disc must measure 6 to 12 inches in diameter and 1 to 3 inches thick. The bark should be firmly attached, which may be difficult if the tree was dead when the disc was cut. Sand at least one side of the disc so the grain can be easily seen. If the disc is treated with a clear finish, both sides must be treated to minimize warping. As the disc dries some cracking or checking can be expected and is allowed.

- **Labeling:** The following parts must be clearly and accurately labeled on the cross section with pins, paper tags, or some other form of identification: 1. Pith 2. Heartwood 3. Sapwood 4. One growth ring (beginning and end) 5. Cambium 6. Bark A separate label attached to the back of the disc must include: 7. Common name 8. Scientific name 9. Tree classification (softwood or hardwood) 10. Age (of the cross section) 11. Collector's name 12. Collection date 13. Collection location (be specific, state and county at a minimum)

D-320-007 PARTS OF A TREE

(This project is only for ages 8 – 11) Prepare a poster, no larger than 24 inches x 24 inches that identifies the main external parts of any tree: 1. Trunk 2. Crown 3. Roots 4. Leaves 5. Flowers 6. Fruit 7. Buds 8. Bark Identifying other internal parts, e.g. phloem, xylem, cambium, annual ring, pith, etc., is optional. Attach a separate label on the back of the poster that includes the exhibitor's name and age.

D-320-008 - LIVING TREE

A living tree seedling grown by the exhibitor from seed in the display container. The seed must be from a species listed in 4H 332. The seedling must be 60 days to 1 year old (on State Fair judging day). The display container must contain at least 8 inches of soil (potting mix or suitable natural soil), have a drainage hole(s), and a drain pan to catch drainage water.

- **Labeling:** A waterproof label must be attached and include: 1. common name 2. scientific name 3. seed treatments (if any) 4. planting date 5. emergence date 6. collector's name
- **Supplemental information about the tree:** e.g. where the seed was collected, growth measurements, uses for that species, etc., may be included in an attached notebook, poster, etc. to enhance educational value. Supplemental information will be an important factor in judging.

D-320-009 – FOREST PRODUCT DISPLAY

Prepare a visual display and/or collection tracing the origin of one non-lumber product that comes from trees and/or forests. The display must be no larger than 24 inches by 22 inches by 28 inches. Photographs, drawings, samples, charts, posters, etc. can be what species of tree the product is derived from and where the product is harvested, grown, or otherwise collected. The product listed must be partially or fully derived from trees; if partial the approximate percentage should be articulated in the display.

- The goal of this exhibit is for students to learn that many products come from trees and forests and to explore one of these products through in-depth study.
- Information about the tree or forest product: e.g. information about harvesting, processing, industry information, and environmental or other benefits may be included to enhance educational value. Supplemental information will be an important factor in judging but should not exceed three printed pages of text. Cite sources of information.
- Personal interviews with industry professionals are encouraged as a source of information.

D-320-010 – FOREST HEALTH DISPLAY

Prepare a visual display outlining a specific forest health issue such as a tree disease, insect pest, animal- or human-caused damage, or an abiotic issue such as weather damage. The display must be no larger than 24 inches by 24 inches by 24 inches. Original photographs, drawings, samples, charts, posters, etc. can be used. Actual specimens are strongly encouraged but must be properly preserved, i.e., insects pinned or placed in vials of alcohol, leaves pressed and dried. Posters submitted may be no larger than 24 inches x 24 inches.

- Explain through the display what species of trees the health issue affects, diagnostic features of the issue (symptoms in trees, identifying features of the pest, etc.), and management options.
- Include common and scientific names of trees and pests.
- Supplemental information about the tree or forest health issue: e.g. origin, proliferation in Nebraska/United States, and physiological effects on the tree may be included to enhance educational value. Supplemental information will be an important factor in judging but should not exceed three printed pages of text. Cite sources of information.
- Attach a separate label on the back of the display that includes the exhibitor's name and age.

D-320-011 – WILDFIRE PREVENTION POSTER

Prepare a poster, no larger than 24 inches x 24 inches that promotes wildfire prevention strategies. Strategies articulated in the poster can include personal and/or land management actions. Attach a separate label on the back of the poster that includes the exhibitor's name and age.

- Supplemental information about wildfire prevention should be attached to the poster: e.g. frequency of wildfires in Nebraska/United States, financial costs of wildfires, environmental factors that contribute to wildfires, etc. to enhance educational value. Supplemental information will be an important factor in judging but should not exceed three printed pages of text. Cite sources of information

D-320-012 - Sustainable Landscape Diorama

Box must be no larger than 24" x 24". The exhibit must show a Nebraska landscape that includes elements such as windbreaks, fields, pastureland, CRP, public lands, community/municipal landscapes. The goal of this exhibit is for students to articulate conservation and sustainability best-practices that can be implemented on a landscape, while addressing landowner and other stakeholder interests.

Label point/nonpoint sources of pollution, carbon sequestration, water-wise practices, wildfire prevention strategies, renewable energy sources, and other conservation practices as well as at least 10 species of plants included in the diorama.

- Attach to the exhibit a brief report including supplemental information describing the diorama, defining conservation practices, and outlining opportunities for landscape improvements to enhance educational value. Supplemental information will be an important factor in judging but should not exceed three printed pages of text. Cite sources of information.

D-320-013 – Tree Planting Project Display

Plant a tree in your community. Prepare a visual display where the student articulates proper tree planting techniques, why the individual tree species was chosen, as well as steps taken to continue care for the tree after initial planting. The display must be no larger than 24 inches by 24 inches by 24 inches. Photographs, drawings, samples, charts, posters, etc. can be used. Posters submitted may be no larger than 24 inches x 24 inches. The tree must have been planted 60 days to 1 year before State Fair judging day. Students must obtain permission from necessary authorities and property owners before planting any trees.

- Labeling: the following information about the tree must be included in the display: 1. common name 2. scientific name 3. planting location 4. planting date 5. tree source 6. planter's name 7. proper tree planting steps 8. tree care (after planting)

D-320-971 OTHER FORESTRY EXHIBIT -COUNTY ONLY
