

Sola Wood Flower Workshop

The latest trend in floral design is the sola flower. Sola flowers or wood flowers are made from a pliable wood from the tapioca plant root. They are pliable and soft and look like real flowers! This workshop will teach participants how to dye a wood flower and use them in a bouquet all while learning design principles.

June 28, 2022

1:00 p.m. - 3:00 p.m.
