[mfreiredeoliveira2@unl.edu](mailto:mfreiredeoliveira2@unl.edu)

### Assigned Counties

- Dodge
- Cuming
- Washington

### Helping you find local answers to...

- Precision and digital agriculture
- Machinery Data Management
- Drone mapping
- Yield monitor data report and analysis
- Data-driven agriculture

### What is the purpose of my job?

1. **Educational Support:** Deliver workshops and materials to enhance understanding of water management and efficient cropping practices for farmers.
2. **Promote Sustainability:** Advocate for sustainable agricultural practices, emphasizing water conservation, improved crop yield, and environmental impact reduction.
3. **Problem Solving:** Identify challenges in water and cropping systems, offering practical solutions and disseminating information on innovative technologies.
4. **Community Engagement:** Facilitate collaboration between farmers, stakeholders, UNL, and government agencies to build a resilient and knowledgeable agricultural community.
