Weeds, pests, weather, nutrients...and the list goes on. You've got a lot to manage to keep crops healthy and growing strong. Nebraska Extension's Midwest Corn Production Clinic can help you make those decisions, whether you are working as a consultant, industry representative or grower. This one-day, research-based workshop tackles issues that are central to making those decisions with the goal of a more profitable corn crop.

Last year's participants valued the clinic at $9.55 per acre in knowledge gained.

MIDWEST CORN PRODUCTION CLINIC
Thursday, Aug. 23, 2018
Registration begins at 8:00 a.m; Clinic is from 8:30 a.m. - 5:00 p.m.
University of Nebraska Eastern Nebraska Research and Extension Center
1071 County Road G, Ithaca, NE

See a growing season in one place! Includes plots with corn growth and development at a range of vegetative/reproductive growth stages.

**Crop Management Training Programs**

**MIDWEST CORN PRODUCTION CLINIC**

**Thursday, Aug. 23, 2018**

Registration begins at 8:00 a.m; Clinic is from 8:30 a.m. - 5:00 p.m.

University of Nebraska Eastern Nebraska Research and Extension Center
1071 County Road G, Ithaca, NE

- **Agronomy Cultural Practices**
  - Discover (or be reminded of) the difference between corn growth and development.
  - Dig plants and stage corn – get dirty
  - Examine the most critical development stages for corn and what can happen: too cold, too hot? Hail? Crusting? Discolored corn? Let’s discuss what you’ve seen in 2018
  - Consider how different hybrids react to the same weather conditions – thinking back to 2017

- **Genetics/Production: How much of the yield potential can be fulfilled?**
  - Plant Population is a decision that can expand or cap yield opportunities
  - Timing of good weather and bad weather stresses are critical to yield
  - How does hybrid maturity interact with planting date?...come and see

- **Insect Damage in Corn**
  - Get hands-on training on scouting and thresholds for European corn borer
  - Learn how to identify and scout for insect damage in corn at different stages of crop growth

- **Plant Pathology**
  - Update on Bacterial Leaf Streak
  - Anticipating and identifying diseases at various crop stages throughout the season
  - Considering corn development when making effective and economical management decisions

- **Soil Fertility**
  - Nutrient management will be discussed with a focus on nitrogen management strategies

- **Keys to Successful Weed Management in Corn**
  - Key 1: Timing is Everything
  - Key 2: Know Your Fields
  - Key 3: Tackle Problems Early
  - Key 4: Use All the Tools in Your Toolbox
  - Key 5: Try Something Different

**Presenters:** Roger Elmore, Nebraska Extension Cropping Systems Agronomist; Tom Hoegemeyer Adjunct Professor of Practice, UNL Department of Agronomy and Horticulture; Brian Krienke, Nebraska Soils Extension Educator; Justin McMechan, University of Nebraska Crop Protection and Cropping Systems Specialist; Chris Proctor, Nebraska Weed Management Extension Educator; Robert Wright, Nebraska Extension Entomologist; and Tamra Jackson-Ziems, Nebraska Extension Plant Pathologist.

**Applied for and pending**

2-Crop Mgt., 2-Nutr. Mgt., 4-Pest Mgt
