

# Making Soil Health Work for Your Operation

Chris Gaesser- Gaesser Farms  
Corning, Iowa

## How Improving Soil Health Helps You

- Reduce Erosion
- Relieve compaction without tillage
- Improving soil structure
- Build organic matter
- Improve fertility
- Help with weed control and weed resistance
- New programs incentivise soil health

# How We Got Motivated

What we were doing wasn't enough  
There's always room for improvement  
Protecting the fields is important

# Our Progression

Started with covers  
Added to rotations  
Made structural improvements  
Started looking at profitability of specific acres  
Found efficiencies to improve what we were doing and to reduce cost  
Working with researchers to find what's next

# Lessons Learned

Whatever you're trying, start small

Timing is important

What works for another operation may not work for yours

Don't be afraid to ask for help

Get creative to help save costs
