

A SPACE FOR ME

Want to add some color to your room or display a special picture? Decorate a picture frame and create a fun and decorative picture for your room. Learn about the elements

of design with this [short video](#).

This fun and simple project teaches youth how to work with color and texture. *Color* is one of the biggest things people pay attention to. *Texture* makes a design distinctive or have identifying characteristics. Adding texture to this picture frame is a fun, yet simple way to make the frame "pop".

Activity: Purchase a simple wooden picture frame and yarn. Carefully take the glass out of the frame with an adult's help. Wrap the yarn around the picture frame, avoiding the photo tabs. Tuck the ends under the thread, tape the yarn or have an adult help you hot-glue the end of the yarn and you have a fun picture frame.

Fair Project: This can be entered at the fair under "A Space for Me", Dept. I, Division 100 and Class 86, other item for a room.
