17 Animal Science 101

25 Office Closed –Merry
Christmas!

31 Early Enrollment
Ends; \$10/member or
\$20/family starts
January 1st

School Enrichment-

Exeter-Milligan 4th grade youth joined me in the positively popcorn school enrichment lesson. We learned about where and how popcorn grows, and how popcorn pops. We also discussed different states of matter and how that pertains to the popping of popcorn.

4-H-

National 4-H Week activities happened between October 6th-12th. It was kicked off with our annual pumpkin decorating and contest. Members of the community voted on the best decorated pumpkins as well as the coloring sheet. For National Youth Science Day five youth participated in the "Hack Your Harvest" computer coding activity.

On October 20th we celebrated our 2019 4-H year with our 4-H Amazing Race and Fall Party. For the amazing race youth raced to different stations doing short activities and games. The last station was a frozen 4-H t-shirt youth had to get unfrozen and put on. After the race was over families enjoyed nachos and youth and adult volunteers were recognized for their achievements from the year.
