Cost per wearing (outfit, e.g., shirt/blouse, pants/skirt, jacket, dress, etc.)
Figure cost per wearing for entire outfit or for each individual piece if parts will be worn individually. Estimate how many times in one year each purchased garment will be worn. (Think about whether you would really wear an item once a week for 52 weeks, for example.) Divide the item cost by the number of wearings for an estimate of the cost per wearing to help decide if the purchase was really a good buy for the purpose.

Narration: In 60 words or less, write a script about you and your outfit. Following is an example:

After inventorying her wardrobe, Jane Smith, of Joy County, decided khaki pants and a fashionable top would be good additions to her closet. Jane purchased her khaki pants on sale, for a $15 savings. The navy top was reduced to 50% off the original price. Both pieces will add zest to Jane's school time wardrobe.
