## AgrAbility's Virtual Fair: Providing Resources Nationwide

During the month of October, AgrAbility projects from 19 states will join together to participate in an AgrAbility Virtual State Fair online to provide resources and information for farmers, ranchers, and other agricultural workers who are working in production agriculture with a disability, functional limitation, or health condition.

The event will occur alongside the 75<sup>th</sup> annual observance of National Disability Employment Awareness Month (NDEAM) and the 30th anniversary of the Americans with Disabilities Act (ADA). Each October, NDEAM celebrates America's workers with disabilities and reminds employers of the importance of inclusive hiring practices.

Beginning October 1, "Cultivating Accessible Agriculture" will be the recurring theme as each day a different state will highlight how it supports and serves this critically important population within that state's agricultural landscape. **Visit the AgrAbility Virtual State Fair, October 1 - 31 via Facebook [@AgrAbility Virtual State Fair](#) or Twitter [@AgrAbilityVSE](#)**

**Nebraska AgrAbility** will participate in the AgrAbility Virtual State Fair on Friday, October 9.

For more information about Nebraska AgrAbility, visit [agrability.unl.edu](http://agrability.unl.edu) or look for Nebraska AgrAbility on Facebook. The web site features success stories and a large toolbox that contains assistive technology solutions for farmers, ranchers, and other agricultural workers with disabilities.

Nebraska AgrAbility is committed to assisting military veterans who want to pursue farming or agricultural careers, as well as beginning farmers with disabilities or other functional limitations, as well as underserved populations and minorities in the agricultural sector.

Nebraska AgrAbility is a statewide partnership between University of Nebraska - Lincoln and Nebraska Easterseals in support of a project funded through the U.S. Department of Agriculture (USDA) and National Institute of Food and Agriculture (NIFA), providing resources and services since 1995.
