

LANGUAGE DEVELOPMENT:

Be a Meteorologist

Encourage preschool children to discuss the weather with this early childhood activity by Nancy E.

Materials Needed: White, blue, black, gray, and yellow paper, and velcro.

Description: Draw a map of your town (simple square, circle, oval shape etc.). Place two strips of velcro across it. Out of the paper make, a black cloud, a white cloud, a blue sky, a sun, blue raindrops, and white snowflakes. Put a velcro piece on the back of each paper (opposite of the kind you put on the town picture).

Have one child each day use the clouds, sun, rain or snow and put them on the town to show the daily weather.

Comments: Make s the children aware of the weather and it can bring conversation as to what to wear that day and it makes them a part of that decision.
