- a. Exhibits at the Sioux County Fair are entered and displayed at the risk of the exhibitor. University of Nebraska-Lincoln Extension in Sioux County, in association with the Sioux County Agricultural Society, accepts exhibits and will exercise due care to protect them. However, University of Nebraska-Lincoln Extension or the Sioux County Agricultural Society or the Sioux County 4-H Council cannot accept responsibility for loss or damage due to the conditions imposed by crowds, the arrangement of the buildings in which displays are housed and the number of exhibits. People who have exhibits of great sentimental and/or monetary value should carefully consider whether such exhibits should be exposed to the hazards of fair.
- b. While the greatest possible care will be exercised by the management to protect patrons of the county fair, each individual will be held personally responsible for any injury.

VIII. Drugs and Alcohol Policy

- a. Use or possession of alcoholic beverages or drugs (except for medical purposes) by any exhibitor who is participating in the youth section of the Sioux County Fair will result in immediate disqualification of that exhibitor's entry.

AEROSPACE: MODEL ROCKETRY

- A. The name and county of each exhibitor should appear separately on the back of each board, poster or article and on the front cover of the notebooks so owner of the exhibit may be identified if the entry tag is separated from the exhibit.
- B. Rockets must be supported substantially to protect it from breakage. Rockets are to be mounted on base that has dimensions equal or less than 12" x 12" and the base should be ¾" thick. No metal bases. If the rocket fins extend beyond the edges of the required base (12" x 12") then construct a base that is large enough to protect the fins. The base size is dictated by the size of the rocket fins. Use a short section (i.e. no taller than an inch of the rocket length) of launch rod to support the rocket.
- C. The rockets should be mounted vertically. Please do not attach sideboards or backdrops to the displays. In addition, a used engine or length of dowel pin should be glued into the board and extended up into the rocket's engine mount to give added stability. Rockets must be equipped for launching, with wadding and parachutes. Rockets entered with "live" engines, wrong base size or sideboards will be disqualified.
- D. A report, protected in clear plastic cover, must include: 1) Rocket specification (include original or photo of manufacture packaging stating rocket skill level), 2) flight record for each launching: weather, distance, flight, height, 3) number of launchings, 4) flight pictures, 5) safety (how did you choose your launch site? Document safe launch, preparations, and precautions) , 6) objectives learned and 7) conclusions.
- E. The flight and record may describe engine used, what rocket did in flight, and recovery success. Points will not be deducted for launchings, flight, or recovery failures described. This includes any damage that may show on the rocket. Complete factory assembled rockets will not be accepted at the State Fair. Judging is based upon display appearance, rocket appearance, workmanship, design, or capabilities for flight, number of launches, and report. Three launches are required to earn the maximum launch points given on the score sheets. Only actual launches count, misfires will not count towards one of the required three launches.

For self-designed rockets only, please include digital recorded copy of one flight. In the documentation please include a description of stability testing before the rocket was flown.

Skill level of project is not determined by the number of years in a project. Skill level is determined by the level listed on the manufacturing packaging. Youth enrolled in aerospace 2,3, or 4 may exhibit in classes H850001-H850006.

4-H Rocket project levels are not intended to correspond to National Association of Rocketry model rocket difficulty ratings or levels.

- F. High power rockets (HPR) is similar to model rocketry with differences that include the propulsion power and weight increase of the model. They use motors in ranges over "G" power and/or weigh more than laws and regulations allowed for unrestricted model rockets. These rockets are NOT appropriate for 4-H projects and will be disqualified.
- G. Posters can be any size up to 28" by 22" when ready for display. Example: tri-fold poster boards are not 28" by 22" when fully open for display.
