

Catch-A-Lamb Test

Turn into the extension office by April 15

1. What should your housing look like for your lamb to make sure it is safe, out of the elements and comfortable?
2. Why should you remain calm and work slowly with your lamb when you first start working with it?
3. Sheep can be stubborn when you are teaching them to lead on a halter and be tied up. What should you do to make this process easier?
4. What types of basic equipment should you have to get your lamb prepared for the fair?
5. How do you plan on treating your lamb if it gets sick?
6. What kind of feed do you plan on feeding your lamb? How much per day?
7. Why is a balanced diet important?
8. Feed and water intake is important to make sure the lamb grows correctly. How will you make sure to keep clean water and feed available to your lamb?
9. Working with your lamb is important to make sure it is ready for the fair. How often will you work with the lamb and spend time with it?
10. On average, how much should your lamb gain per day?
