

Catch-A-Goat test

Turn into the extension office by April 15

1. What should your housing look like for your goat to make sure it is safe, out of the elements and comfortable?
2. What are some ways to transport your goat?
3. How do you plan to transport your goat?
4. Worms and coccidiosis can be a big problem in young goats. How will you be able to tell if your goats might have these illnesses? How will you treat it if needed?
5. How do you plan on treating your goat if it gets sick?
6. What kind of feed do you plan on feeding your goat? How much per day?
7. Why is a balanced diet important?
8. Feed and water intake is important to make sure the goat grows correctly. How will you make sure to keep clean water and feed available to your goat?
9. Working with your goat is important to make sure it is ready for the fair. How often will you work with the goats and spend time with it?
10. Goats can be sneaky and look for ways to get out of their pen. What kind of fencing will you use for the goat?
