

Catch-A-Pig test

Turn into the extension office by April 15

1. What should your housing look like for your pig to make sure it is safe, out of the elements and comfortable?
2. What are some ways to transport your pig?
3. How do you plan to transport your pig?
4. How often should you check your pig to make sure it is healthy?
5. How do you plan on treating your pig if it gets sick?
6. What kind of feed do you plan on feeding your pig? How much per day?
7. Why is a balanced diet important?
8. Feed and water intake is important to make sure the pig grows correctly. Approximately, how much feed and water will your pig consume at 200 pounds?
9. Exercise is important, how often will you exercise and work with your pig?
10. What is the difference between the market hog show and showmanship?
