

Scotts Bluff County Extension participates in the annual Water Education for Tomorrow programming for 5th grade students and their teachers. Students in the photo are learning how to set a siphon tube.

The Water Education for Tomorrow program focuses on aquatic wildlife, the effects of water erosion, and water and fossils. A total of 270 5th grade students and 14 teachers participated in this training. Gary Stone, Water & Integrated Cropping Systems Educator and Stephanie Connelly, 4-H Assistant lead the irrigation segment that was one of three other segments which achieved the highest relevance to the standards set. A comment from one of the fifth-grade teachers, for the overall WET program, “You did a wonderful job making the day interactive and engaging! Thank you for all the fun!”

Programs At-A-Glance

- 1,445 youth from Scotts Bluff County took part in Science Technology and Engineering activities to learn more about engineering, rocketry, renewable energy, and more.
- Ninety-three private and chemigation applicators and 172 commercial/non-commercial applicators participated in pesticide applicator safety education and chemigation.
