December 4-PEARS Help Session

December 5-College & Career Success Team Retreat

December 7-4-H Share Day

December 11-Ag & Food Systems Team meeting

December 14-Beef @ School lesson

November was a busy month for program planning and actual programming. Once again, L/N schools participated in the annual Connect the Dots simulation allowing all sophomores to explore the military, 2 year college, and 4 year college degrees as well as acquire jobs within the 16 career clusters. Southern Plains had a very successful 1st annual Inventure Day. We had 51 students in attendance. Youth worked through the Inventure lab stations to create a new product from a given widget. They learned about branding, target markets, finances, and finished up the day with a product pitch competition. December has been dedicated to wrapping up the year and completing reports and learning the new PEARS reporting system.
